

Appendix I-4

Table of Deliverables for the Going Home Plus Evaluation

Report	Completion Date
Status of the project: Descriptive reports on the number of persons identified, recruited, enrolled, and transitioned. Cross-tabulations by island, target group that the person belongs to (elderly, younger person with disability, DD), length of stay in the facility, type of facility (hospital waitlist, NF, ICF-MRc).	Middle of CY2008 (October)
CY2008 findings: Descriptive reports on the numbers of persons identified, recruited, enrolled, and transitioned. Cross-tabulations by island, the target group that the person belongs to (elderly, younger person with disability, DD), length of stay in the facility, type of facility (hospital waitlist, NF, ICF-MRc). Comparison to Benchmarks on the number to be transitioned during year 2.	End of CY2008
Status of the project: Descriptive reports on the numbers of persons identified, recruited, enrolled, and transitioned. Cross-tabulations by island, the target group that the person belongs to (elderly, younger person with disability, DD), length of stay in the facility, type of facility (hospital waitlist, NF, ICF-MRc).	CY2009, Quarter 1
	CY2009, Quarter 2
	CY2009, Quarter 3
Year 3 findings. Reports on the numbers of persons identified, recruited, enrolled, and transitioned. Reports on length of stay in the community and reasons for reinstitutionalization. Descriptive statistics and cross-tabulations by island, the target group that the person belongs to (elderly, younger person with disability, DD), length of stay in the facility, type of facility (hospital waitlist, NF, ICF-MRc). Reports on systemic barriers and change, consumer satisfaction, and trainings offered. Comparison to Benchmarks on the number to be transitioned during year 3.	End of CY2009
Status of the project: Descriptive reports on the numbers of persons identified, recruited, enrolled, and transitioned. Cross-tabulations by island, the target group that the person belongs to (elderly, younger person with disability, DD), length of stay in the facility, type of facility (hospital waitlist, NF, ICF-MRc).	CY2010, Quarter 1
	CY2010, Quarter 2
	CY2010, Quarter 3
Year 4 findings. Reports on the numbers of persons identified, recruited, enrolled, and transitioned. Reports on length of stay in the community and reasons for reinstitutionalization. Descriptive statistics and cross-tabulations by island, the target group that the person belongs to (elderly, younger person with disability, DD), length of stay in the facility, type of facility (hospital waitlist, NF, ICF-MRc). Reports on systemic barriers and changes, consumer satisfaction, and trainings offered. Comparison to Benchmarks on the number to be transitioned during year 4.	End of CY2010
Status of the project: Descriptive reports on the numbers of persons identified, recruited, enrolled, and transitioned. Cross-tabulations by island, the target group that the person belongs to (elderly, younger person with disability, DD), length of stay in the facility, type of facility (hospital waitlist, NF, ICF-MRc).	CY2011, Quarter 1
	CY2011, Quarter 2
	CY2011, Quarter 3

Appendix I-4

Table of Deliverables for the Going Home Plus Evaluation

Report	Completion Date
<p>Year 5 findings. Reports on the numbers of persons identified, recruited, enrolled, and transitioned. Reports on length of stay in the community and reasons for reinstitutionalization. Descriptive statistics and cross-tabulations by island, the target group that the person belongs to (elderly, younger person with disability, DD), length of stay in the facility, type of facility (hospital waitlist, NF, ICF-MRc). Reports on systemic barriers and changes, quality of life, consumer satisfaction, and trainings offered. Comparison to Benchmarks on the number to be transitioned during year 5. Multiple and logistic regression analyses (as appropriate) to examine the impact of demographics, prior facility type, length of stay in the facility, current living arrangements, social support, and health characteristics on preference to transition, number of days in the community, and occurrence of adverse events.</p>	End of CY2011
