13d. Community Mental Health Rehabilitative Services (continued)

8. Substance Abuse Treatment (SAT) services: SAT services furnished under §440.130(d) are provided by a qualified mental health professional to include but not limited to a licensed psychiatrist, licensed psychologist, licensed clinical social worker with experience in behavioral health, licensed advance practical nurse in behavioral health, licensed mental health counselor, or a licensed marriage and family therapist with experience with behavioral health or a substance abuse counselor certified by the State. SAT services shall be provided without limits on the number of visits when medically necessary; prior authorization is required, and monthly assessments are performed to ensure that services are medically necessary. SAT services are recommended by a physician or other licensed practitioner of the healing arts, within the scope of his or her practice under State law. The substance abuse provider assists an individual in achieving specific objectives of treatment or care for a substance use or mental health disorder through a face-to-face, one-to-one therapeutic relationship. Services are generally directed toward reducing psychosocial stress and teaching coping and problem-solving skills, using supportive and cognitive-behavioral approaches that restore a participant's best possible functional level.

- 9. Peer support services:

Peer Support Services are culturally competent individual and group services that promote recovery, resiliency, engagement, socialization, self-sufficiency, self-advocacy, development of natural supports, and identification of strengths through structured activities. Peer support providers are self-identified consumers who are in recovery from mental illness, physical illness and/or substance use disorders.

Peer support services are delivered directly to Medicaid beneficiaries with mental health, physical illness and/or substance use disorders. Peer support services furnished to parents/caretakers/family members are for direct benefit of the beneficiary.

Peer support services may be provided to Medicaid consumers and their family members (or parents/caretakers) by a peer support specialist certified by the State Department of Health, Adult Mental Health Division (AMHD) as part of their Hawaii Certified Peer Specialist (HCPS) program or a peer support program established by another State agency that meets existing and established national peer support criteria.

Peer support providers meet the following minimum requirements for supervision, care coordination and training: 1) Supervision is provided by a mental health professional (as defined by the State); 2) Peer support services are coordinated within the context of a comprehensive, individualized plan of care that reflects the needs and preferences of the participant in achieving the specific, individualized goals that have measurable results and are specified in the service plan; 3) Training and Credentialing: Peer support providers must complete training and certification as defined by the

State. The peer specialist must demonstrate the ability to support the recovery of others from mental illness and or substance use disorders. Peer support providers must complete ongoing continuing educational requirements.

The covered services are available only to Medicaid eligible recipients with a written plan of care developed with the participation of a qualified mental health professional to include but not limited to a licensed psychiatrist, licensed psychologist, licensed clinical social worker with experience in behavioral health, licensed advance practical nurse in behavioral health, licensed mental health counselor, or a licensed marriage and family therapist with experience with behavioral health.

Peer support services include one or more of the following service components:

- Educational Skill Building Groups means providing a supportive environment in which beneficiaries and their families learn coping mechanisms and problem-solving skills to help the beneficiaries achieve desired outcomes. These groups promote skill building for the beneficiaries in the areas of socialization, recovery, self-sufficiency, self-advocacy, development of natural supports, and maintenance of skills learned in other support services.
- Engagement means Peer Support Specialist led activities and coaching to encourage and support beneficiaries to participate in treatment. Engagement may include supporting beneficiaries in their transitions and supporting beneficiaries in developing their own recovery goals and processes.
- Therapeutic Activity means a structured non-clinical activity provided by a Peer Support Specialist to promote recovery, wellness, self-advocacy, relationship enhancement, development of natural supports, self-awareness and values, and the maintenance of community living skills to support the beneficiary's treatment to attain and maintain recovery within their communities. These activities may include, but are not limited to, advocacy on behalf of the beneficiary; promotion of self-advocacy; resource navigation; and collaboration with the beneficiaries and others providing care or support to the beneficiary, family members, or significant support persons.

Limitations (continued)

Peer support services are provided without limits on the number of visits when medically necessary; prior authorization is required, and monthly assessments are performed to ensure that benefits are medically necessary.

Peer support services are not provided in an institution for mental disease as defined in SSA Sec. 1905(i) and 42 CFR 435.1010
