

Screening, Brief Intervention, and Referral to Treatment (SBIRT)

An Overview of the New SBIRT Manual and How to use it to Effectively Implement SBIRT in a Clinical Setting

Hawai'i Department of Human Services
Med-Quest Division
2023

Substance misuse and overdose deaths are increasing in Hawai'i. To better identify substance misuse early, prevent worsening, and provide interventions and treatment, **Med-QUEST**, along with our partner Health Management Associates, is providing an **in-person interactive session on Screening, Brief Intervention, and Referral to Treatment (SBIRT)**. SBIRT is an evidence-based practice that is reimbursable. At the end of this training, participants will be able to:

- Define SBIRT and explain its importance in patient care
- List key considerations when implementing SBIRT in their clinical setting
- Apply key principles of motivational interviewing to patient care
- Describe how SBIRT is coded to make it a billable, sustainable service

**In-person session on Hawaii, Maui, Kauai,
and Oahu will take place the week of
August 7th - 11th**
