## **12.1 LONG TERM CARE**

---

### **12.1.1 Description**

- a) Nursing facility providers can be either freestanding nursing facilities or acute care hospitals, with SNF/ICF/Subacute Levels of Care (LOC). The types of long-term care facility levels currently recognized by the Hawaii Medicaid Program are as follows:
- Skilled Nursing Facilities (SNFs) or Nursing Facilities (NFs) – Level “C”
  - Intermediate Care Facilities (ICFs) or Nursing Facilities (NFs) – Level “A”
  - Intermediate Care Facilities for Individuals with Intellectual Disability (ICF-ID) or Nursing Facilities (NFs) – Level “B”
- b) Under federal Medicaid rules, the level of care provided at Care Homes (CHs) is custodial and does not qualify for Medicaid coverage.
- c) Although Medicare considers certain services as SNF care, Medicaid is not bound by Medicare guidelines.
- d) In making determinations of level of care (SNF, ICF, CH or other), the patient’s situation and facility availability are to be considered. The availability, training, and capability of the family as primary caregivers should also be considered.
- e) Level of care determinations is made on a case-by-case basis and involves an evaluation of the patient’s unique situation and medical care needs. The following is a clarification of criteria and definitions currently used by the Medicaid Program to assist Medicaid’s reviewers in the determination of the level of long-term care (SNF or ICF) appropriate to the medical needs of the Medicaid client.
- f) Home and Community Based Services (HCBS) in the Medicaid client’s home or other private residence as well as in a certified residential setting are long-term care Medicaid services. These long-term care services shall only be provided through the QUEST Integration (QI) program by a health plan.
- g) Resident rights are to be adhered to and are a Federal Requirement.

### **12.1.2 Amount, Duration and Scope**

#### **12.1.2.1 Subacute Level of Care**

Requirements:

- a) The facility must be licensed, and Medicare certified as an acute hospital or an SNF facility.

- b) If a patient is dually eligible for Medicare and Medicaid and his/her confinement is a Medicare qualified SNF stay, subacute level of care will begin when the patient no longer qualifies for a Medicare SNF stay.

The Subacute level of care is designated either as Level I or II:

### **Subacute Level I**

- a) Patients who require continuous mechanical ventilation for at least 50% of each day and are medically stable.

### **Subacute Level II**

- a) At a minimum, the patient requires four (4) hours of skilled nursing per day for the following services:
1. Patients with complex drains or tubes, including Ommaya drains, fecal reimplantation, and Aspira chest tubes, drains requiring monitoring and draining (i.e. JP drains) who need at least 4 hours of skilled nursing care daily.
  2. Continuous intravenous therapy or intermittent intravenous therapy at least once every eight hours.
  3. Complex skilled nursing care of patients with conditions such as HIV/AIDS, terminal disease, and chronic dialysis who are at high risk of medical complications if discharged.
  4. Complex skilled nursing care of patients who are receiving radiation therapy, hydration, or parenteral pain control medications who are at high risk for significant medical complications.
  5. Complex skilled nursing care of psychiatric patients at high risk for imminent life-threatening complications to themselves or others if discharged or with bulimia/anorexia nervosa who are at high risk of medical complications if discharged.
  6. Treatment of Stage III and above pressure ulcers or wound infections.
  7. Ventilation or inhalation therapy services at least daily.

**LONG TERM CARE**

- b)** Other patients who need at least 4 hours of skilled nursing care daily, with the conditions such as described below, will be approved on a case-by-case basis:
1. Enteral feedings with J-tube, G-tube or NG tube for nutritional needs, hydration and/or medication administration.
  2. Medically necessary isolation.
  3. Patient with external fixators, traction (excluding Buck's traction).
- c)** Patients who do not require continuous mechanical ventilation for at least 50% of each day, are medically stable, and require the following complex skilled nursing services:
1. Tracheostomy care with suctioning at least once per hour.
  2. Tracheostomy care in bed-bound hemodialysis patients.
  3. Tracheostomy care with suctioning at least once per shift in patients who are morbidly obese.
  4. Tracheostomy care with suctioning at least once per shift in patients who require wound care for multiple stage 2 or higher wounds.
  5. Telemetry in patients who meet criteria for continuous cardiac monitoring.
  6. Any combination of mechanical ventilation, tracheostomy care with suctioning, and inhalation treatment at least once every eight hours.
  7. Stable newborns/premature infants under age one year who are inpatients in an acute care hospital for at least one week and require manual stimulation for bradycardia/apnea or nasogastric or gastrostomy feedings.
  8. Stable patients who are admitted to an acute hospital for an infection for training of intravenous antibiotic administration or for close monitoring of oral antibiotics.
- d)** In response to the coronavirus (COVID – 19) pandemic and need for specialized care, MQD is adding the scenarios below as qualifying for Subacute reimbursement thru the end of the federal public health emergency (PHE).

**LONG TERM CARE**

Patient is at an ICF/SNF level of care requiring isolation or quarantine for COVID-19 as determined by the disease investigator with DOH's Disease Outbreak Control Division, coming from an acute facility or community setting and entering a long-term care facility, and meeting one of the following:

- Patient is COVID-19 positive.
- Patient is under isolation due to having been identified as a COVID-19 case; or
- Patient is in community setting (non-facility) placed under quarantine due to a defined exposure to a known COVID-19 case and transferred to a nursing facility.

**12.1.2.2 Skilled Nursing Facility (SNF)**

a) The patient must require daily skilled nursing services on more than one shift per day; daily restorative skilled rehabilitation services; or a combination of skilled nursing and skilled rehabilitative services. Examples of skilled nursing services include suctioning, IV therapy, and tube feedings in which use of enteral pumps is necessary. Examples of skilled rehabilitation services include physical therapy, occupational therapy or speech therapy.

- All IM medications (i.e., antibiotics) must be medically justified. IM medications given on more than 1 shift a day do not automatically qualify for SNF level of care.
- All IV therapy must be medically justified. IV therapy (i.e., hydration, antibiotics) is considered an SNF service for the duration of the therapy.
- Skilled rehabilitation services must be required and provided on a "daily basis" (7 days a week). However, if skilled rehabilitation services are not available on a 7-day-a-week basis, a patient whose SNF stay is based solely on the need for skilled rehabilitation service(s) would meet the "daily" requirement when he/she needs and receives therapy on at least 5 days a week. A break of 1 to 2 days during which no skilled rehabilitation services are furnished would not violate the "daily" requirement (a discharge from a facility or lowering the level of care to ICF would not be practical). For example, if the patient's physician suspends therapy sessions for medical reasons for 1 to 2 days, payment for SNF stays would be allowed since discharge in such a case would not be practical. However, no payment will be made for the specific rehabilitation services since services were not rendered.

b) The patient must require 24-hour supervision and observation by a professional

nurse – Registered Nurse (RN) or Licensed Practical Nurse (LPN).

### **12.1.2.3 Intermediate Care Facility (ICF)**

- a) The patient must require intermittent skilled nursing, daily skilled nursing assessment and 24-hour supervision. The skilled nursing services and daily skilled nursing assessments must be provided by professional nurses – RNs or LPNs.
- b) Examples of intermittent skilled nursing services: Changing of indwelling Foley catheters, administering IM medications three times a week.
- c) The patient may require other services furnished by ICFs such as:
  - Non-Skilled Nursing Services (see examples listed below)
  - Significant assistance with activities of daily living (ADLs)
  - Maintenance therapies, medical gases
- d) Non-Skilled Nursing Services:
  - Administration of routine oral medications, eye drops and ointments.
  - General maintenance care of colostomies or ileostomies.
  - Routine services in connection with indwelling catheters or tubes. This would include emptying and cleaning containers, changing tubing and refilling irrigation containers with solution.
  - Changes of dressings for non-infected post-operative wounds or for chronic conditions not involving sterile dressings and prescription medication.
  - Prophylactic and palliative skin care, including bathing and topical application (includes foot care).
  - General methods of treating incontinence, including use of diapers, bed pads, rubber sheets and bedpans. (All incontinent patients are not automatically ICF. Care Home residents may have daily incontinence, but should not require attention at night or be excessively incontinent).
  - General maintenance care in connection with plaster casts.
  - Routine care in connection with braces and similar devices.

- Use of heat for palliative and comfort purposes.
- Administration of medical gases after initial institution and stabilization of treatment and after the patient has received teaching and training.
- General supervision of exercises which have been taught to the patient.
- Assistance in dressing, eating and toileting.

#### **12.1.2.4 Intermediate Care Facility for Individuals with Intellectual Disability (ICF/ID)**

- a) Individuals that have been diagnosed as having an intellectual disability as the result of developmental disability or who have acquired the disability because of injury or illness before the eighteenth birthday are considered to be intellectually disabled and may be considered for care under these provisions.

HRS § 333F-1 defines intellectual disability as follows: “ ‘Intellectual Disability’ means significantly sub-average general intellectual functioning resulting in or associated with concurrent with moderate, severe, or profound impairments in adaptive behavior and manifested during the developmental period.”

HRS § 333F-1 defines developmental disabilities as follows: “ ‘Developmental disabilities’ means a severe, chronic disability of a person which:

- 1) Is attributable to a mental or physical impairment or combination of mental and physical impairments;
- 2) Is manifested before the person attains age twenty-two;
- 3) Is likely to continue indefinitely;
- 4) Results in substantial functional limitations in three or more of the following areas of major life activity: self-care, receptive and expressive language, learning, mobility, self-direction, capacity for independent living, and economic sufficiency; and
- 5) Reflects the person’s need for a combination and sequence of special, interdisciplinary, or generic care, treatment, or other services which are of lifelong or extended duration and are individually planned and coordinated.”

Significantly sub-average intellectual functioning is determined by a standardized measurement of intelligence testing, the outcome of which yields an intelligence

**LONG TERM CARE**

quotient (IQ) of 2 or more standard deviations below the mean, or an IQ of 70 or below.

The severe chronic disability constitutes substantial impairment for the affected individual, and is attributable to intellectual disability or related neurological conditions that result in impairment of general intellectual functioning or adaptive behavior similar to that of a person with intellectual disability. Substantial functional limitations are identified by a score of 3 or more standard deviations (SD) below the mean on a standardized assessment of adaptive behavior, which may be adjusted by utilizing a 95 per cent confidence interval.

- b) Individuals who are ICF/ID level of care may require institutionalization where they receive a continuous active program that includes aggressive, consistent implementation of a program of specialized and generic training, treatment and related services. Those that do not require these services and can be managed in a less restrictive environment may be admitted into the Department of Health (DOH) 1915(c) Home and Community Based Services (HCBS) waiver.
- c) Application for admission to the ICF/ID institutional setting requires the submission of **Form 1150** or for those being re-admitted from acute hospital care, Form 1150A. Form 1150C should be submitted for the Waiver Program authorization. These forms are utilized for admission to a facility or entry into a program and are in force for 60 days. They may be renewed if implementation is not made within the 60- day period. A copy of the Form and instructions are located in Appendix 4.
- d) Subsequent to the DHS/Med-QUEST consultant's determination/authorization of the applicant's or client's level of care, copies of the Form 1150 shall be distributed as follows: one (1) copy shall be retained by the Med-QUEST Division/Health Care Services Branch (MQD/HCSB), (2) the ICF-ID facility and (3) the Medicaid Program's Fiscal Agent shall respectively receive their copies.
- e) Payment Requirements/Requirements for Participation – Payment for ICF-ID services are predicated on the following:
- ICF-ID services must be provided by facilities meeting the eligibility requirements specified in the Hawaii Administrative Rules (HAR), Title 17, Department of Human Services, Subtitle 12 Med-QUEST Division, Chapters 17-1736 and 17-1722;
  - ICF-ID facilities must provide inpatient or authorized community-based services that are designed primarily for the treatment and rehabilitation of persons with an intellectual disability or persons with related conditions. At a minimum, these services include:

**LONG TERM CARE**

- 1) Twenty-four (24) hour supervision of persons with an intellectual disability or persons with related conditions in the least restrictive protected residential setting;
- 2) A continuous, individualized, active treatment program that includes aggressive, consistent implementation of specialized and generic training, specific therapies or treatments, activities, health services and related services that are directed towards:
  - The acquisition of behaviors necessary for the client to function with as much self determination and independence as possible; and
  - The prevention or deceleration of regression or loss of current optimal functional status.
- f) Active treatment does not include services to maintain generally independent clients who are able to function in the absence of a continuous active treatment program or with little supervision;
- g) Interventions to manage inappropriate client behavior used with sufficient safeguards and supervision, to ensure that client's safety, welfare, and civil and human rights are adequately protected;
- h) Sufficient direct care staff to manage and supervise clients in accordance with their individual program plans, to respond to injuries and symptoms of illness and to handle emergencies in each defined residential living unit;
- i) Preventive and general medical care as well as annual physical exams that include:
  - Evaluation of each client's vision and hearing;
  - Administration of immunizations, using the recommended guidelines from either the Public Health Service Advisory Committee on Immunization practices, or the American Academy of Pediatrics' Committee on the Control of Infectious Diseases;
  - Routine laboratory screening exams and special studies; and
  - TB controls must be appropriate to the facility's population and in accord with recommendations from the College of Chest Physicians and/or the Communicable Disease section of the American Academy of Pediatrics.
- j) Licensed nursing services sufficient to care for client's health needs, including those

clients with medical care plans;

- k)** Provision of, or arrangements for comprehensive dental diagnostic services and comprehensive dental treatment services that include:
- The availability of emergency dental treatment on a twenty-four (24) hours per day basis by a licensed dentist; and
  - Dental care needed for relief of pain, infection or management of trauma by a licensed dentist for residents 21 years of age and older. Residents under the age of 21 receive a wider range of benefits as listed in Chapter 14 “Dental Services”.
- l)** Provision of, or arrangements for routine and/or emergency drugs and biologicals administered in compliance with physician’s orders;
- m)** A nourishing well-balanced diet, including modified and specially prescribed diets, on at least, a three (3) meals-per-day basis;
- n)** Physician services available twenty-four (24) hours a day:
- To develop and maintain, in coordination with licensed nursing personnel, a physician directed medical care plan of treatment for individual clients determined to need licensed nursing care on a twenty-four (24) hour basis, and
  - To participate in establishing an initial individualized program plan for a newly admitted client.
- o)** Provision of necessary services, including emergency and other health care services through contractual agreements that:
- Stipulate the responsibilities, functions, objectives, service fees and other terms agreed to by the ICF-ID facility and the contractor, and
  - Provide that the ICF-ID is responsible for assuring that these services meet the standards for quality services.
- p)** Payment for ICF-ID services shall also be contingent upon:
- The determination by the department that the applicant or client requires ICF-ID level of care services.
  - Authorization by the department, for admission to a free-standing or distinct section of a facility that is for ICF-ID clients or to an authorized Medicaid

Home and Community-Based Services (HCBS) waiver program.

- q) Compliance with utilization control processes, developed and administered in accordance with State and Federal regulations, shall also be required as a basis for reimbursement. Refer to HAR section 17-1737-37 for the specific ICF-ID utilization control provisions.
- r) Inspection of care (IOC) reviews can be conducted by departmental personnel to evaluate the provider’s performance relating to utilization of care and services provided to clients.
- s) Additional requirements for payment of ICF-ID services are as follows. Briefly, providers shall:
  - Establish and implement written policies and procedures that govern access to, duplication of, and dissemination of information from applicants’ or clients’ records;
  - Ensure that clients have freedom to select any qualified Medicaid provider of ICF-ID services;
  - Submit a written report (Form 1147i) to the Department within seventy-two (72) hours of any incident that results in harm to the Medicaid client (See Appendix 5 for a sample of the Incident Report, 1147i);
  - Ensure that clients at the ICF-ID level of care are provided treatment and services without discrimination, separation or any other distinction on the basis of race, color, national origin, or mental or physical handicap; and
  - Ensure that medical records are retained in accordance with State law.

**12.1.2.5 Coding and Claims Submission**

For each change in level of care, the provider must generate a discharge claim for the prior level of care and readmit the patient at the lower level of care. In addition, at the time the patient becomes waitlisted, the provider will generate a discharge claim for the acute status.

The following lists the requisite Revenue Code and Bill Type required to bill the appropriate level of care:

<b>Level of Care</b>	<b>Revenue Code</b>	<b>Bill Type</b>
Subacute I Nursing Facility	0191,0192	21X

**LONG TERM CARE**

Subacute I Hospital	0190	21X
Subacute II Nursing Facility	190	21X
Subacute II Hospital	0191, 0192	21X
ICF	01XX	66X
ICF-ID	01XX	65X
SNF	01XX	21X
Swing bed ICF	01XX	11X
Swing bed SNF	01XX	21X
Waitlisted ICF	011X	11x occ. span code 74
Waitlisted ICF ancillary- Medicare primary	Na	22X occ. span code 74
Waitlisted ICF ancillary- Medicaid primary	Na	23X occ. span code 74
Waitlisted SNF	01XX	11X occ. span code 75
Waitlisted SNF ancillary- Medicare primary	Na	22X occ. span code 75
Waitlisted SNF ancillary- Medicaid primary	Na	23XX occ. span code 75

Ancillary charges billed on the same claims as room and board charges for SNF, SNF Waitlisted, ICF, and ICF Waitlisted levels are allowed, but will not pay separately.

## **12.2 REIMBURSEMENT**

---

### **12.2.1 Description**

- a) There is no limit on days covered by the Medicaid program; however Medicaid is the payor of last resort.
- b) Services included in the basic PPS rate for SNF, ICF, ICF/ID and Subacute are: The reasonable and necessary costs of providing the following items and services shall be included in the basic PPS rate and shall not be separately reimbursable, unless specifically excluded under subsection (c):
- Room and board;
  - Administration of medication and treatment and all nursing services;
  - Development, management and evaluation of the written patient care plan based on physician orders that necessitate the involvement of skilled technical or professional personnel to meet the client's care needs, promote recovery and ensure the client's health and safety;
  - Respiratory services provided by nursing and/or respiratory therapy staff;
  - Observation and assessment of the client's unstable condition that requires the skills and knowledge of skilled technical or professional personnel to identify and evaluate the client's need for possible medical intervention, modification of treatment, or both, to stabilize the client's condition;
  - Health education services, such as gait training and training in the administration of medications, provided by skilled technical or professional personnel to teach the client self-care;
  - Provision of therapeutic diet and dietary supplement as ordered by the attending physician;
  - Laundry services, including items of client's washable personal clothing;
  - Basic nursing and treatment supplies, such as soap, skin lotion, alcohol, powder, applicators, tongue depressors, cotton balls, gauze, adhesive tape, Band-Aids, incontinent pads, V-pads, thermometers, blood pressure apparatus, plastic or rubber sheets, enema equipment and douche equipment;
  - Non-customized durable medical equipment and supplies used by individual clients, but which are reusable. Examples include items such as ice bags, hot

**LONG TERM CARE**

water bottles, urinals, bedpans, commodes, canes, crutches, walkers, wheelchairs, and side-rail and traction equipment;

- Activities of the patient's choice (including religious activities) that are designed to provide normal pursuits for physical and psychosocial well being;
  - Social services provided by qualified personnel;
  - A review of the drug regimen of each resident at least once a month by a licensed pharmacist;
  - Maintenance therapy; provided, however, that only the costs that would have been incurred if nursing staff had provided the Maintenance therapy will be included in calculating the basic PPS rates;
  - Provision of and payment for, through contractual agreements with appropriate skilled technical or professional personnel, other medical and remedial services ordered by the attending physician which are not regularly provided by the provider. The contractual agreement shall stipulate the responsibilities, functions, objectives, service fee, and the other terms agreed to by the provider and the person or entity that contracts to provide the service;
  - Feeding assistance performed by a feeding assistant, nurse aide, or nurse. The feeding assistant must work under the supervision of a registered nurse or licensed practical nursing who is licensed to practice in Hawaii; and
  - Recurring, reasonable and incremental costs incurred to comply with OBRA 87.
- c) The costs of providing the following items and services shall be specifically excluded from reimbursement under this plan, and shall be billed separately to the department by the providers:
- Physician services, except those of the medical director and quality assurance or drug use Review board, or all three;
  - Drugs that are provided to residents in accordance with Title XIX policy;
  - Laboratory, x-ray, and EKG;
  - Ambulance and any other transportation for a medical reason that is not provided by the provider and not included in the costs used to calculate the basic PPS rates;
  - Dental – Refer to Chapter 14 Dental Services for details;

- Optical;
- Audiology;
- Podiatry;
- Physical therapy, excluding maintenance therapy. Refer to Chapter 17, Rehabilitative Therapy Services for details;
- Occupational therapy, excluding maintenance therapy. Refer to Chapter 17, Rehabilitative Therapy Services for details;
- Speech and hearing therapies. Refer to Chapter 17, Rehabilitative Therapy Services for details.
  - Customized durable medical equipment and such other equipment or items that are designed to meet special needs of a resident and are authorized by the department;
  - Charges for ancillary services are not included in calculating the basic PPS rates and shall be paid as follows:
    - (A) Providers that have the capability shall bill the department separately for ancillary services;
    - (B) The department shall make an ancillaries payment to providers that it designates as incapable of billing for ancillary services on an itemized basis;
    - (C) In order to receive an ancillaries payment, the provider must make assurances satisfactory to the department that it is committed to acquiring the ability to bill on an itemized basis for ancillaries, and is pursuing that goal with all deliberate speed;
    - (D) As part of the FY 98 rebasing, the department shall identify ancillary services for which a provider lacks the ability to bill separately and calculate a per diem amounts as an ancillaries payment;
    - (E) No provider that receives an ancillaries payment shall otherwise bill the department separately on behalf of a Title XIX resident for any type of ancillary service that is included in calculating its ancillaries payment. A provider that receives an ancillaries payment must also implement procedures and assure the department that no other person or entity will bill separately for any type of ancillary service that is included in calculating the ancillaries payment;
    - (F) The provider shall provide to the department upon request the

- progress that it is making in its efforts to acquire the ability to bill separately for ancillary services. If and when the provider acquires that ability, then it shall promptly notify the department in writing;
- (G) Once the department determines that a provider is capable of billing for some or all ancillary services on an itemized basis, then it shall provide advance written notice to that provider of a date upon which it will either cease making or reduce the ancillaries payment. If the provider acquires the capability of billing for some (but not all) ancillary services that were included in calculating its ancillaries payment, then the department shall reduce the ancillaries payment accordingly; and
  - (H) The department shall make available all necessary data to ensure the appropriate accounting for ancillary.
  - (I) The personal funds of medical assistance recipients may not be charged any costs for routine personal hygiene items and services provided by the provider.

## **12.3 BED-HOLD REQUIREMENTS FOR LONG TERM CARE**

---

### **12.3.1 Description**

A Medicaid client's bed may be reserved during a client's temporary absence from the long-term care facility if:

- The client's plan of care provides for absences other than for hospitalization and is approved by the client's attending physician;
- Any single episode during which a bed is reserved does not exceed a period of three consecutive days, unless a request for prior approval is submitted to the program, reviewed and approved by DHS;
- The total number of days a client reserves a bed does not exceed twenty-four (24) days in a calendar year (consecutive 12 months from the first day of the calendar year); and
- A record is maintained of the client's medical chart which accounts for the number of days and specific dates for any year that a client reserved a bed, subject to periodic review by the department's representatives.

### **12.3.2 Coding and Claims Submission**

Bed-hold services are reimbursable when they are billed using Revenue Code '0180' with Bill Type '11X' with the value code 74 or 75, '21X', '65X' or '66X'. Each bed-hold day must be billed as a separate line item.

### **12.3.3 Authorization**

The DHS 1147 or 1150 forms are used for the Medicaid Program only. If a patient is not Medicaid eligible or has not applied to Medicaid, do not submit any 1147 or 1150 form. See the section below and refer to Appendix 4 for specific instructions. The patient's admission to a long-term care facility must be recommended by the attending physician and approved by the DHS Consultant or his representative.

## **12.4 LONG TERM CARE EVALUATION FORM 1147**

---

### **12.4.1 Submission of Form 1147**

- a) Form 1147 must be completed and submitted to the DHS or its designee for the following:
- Admission from residence to a long term care facility,
  - Transfer from an acute hospital to a long term care facility for admission or re admission if Medicaid is the primary insurance,
  - Transfer from one level of care to another (i.e. from and to subacute I subacute II, SNF, ICF and Hospice) or from one facility to another.
  - Changes in level of care within a facility (includes swing bed),
  - Transfer from a Medicare or other health insurance primary coverage at a long term care institution to a Medicaid primary coverage, even though Medicaid may have been paying the Medicare co-insurance or deductible or coordinating benefits with the other health insurance.
  - Private patients already confined in long term care institutions that apply for medical assistance.
- b) Forms should be submitted prior to admission, transfer or change in status. The use of any other form is not permitted.

### **12.4.2 Action by DHS or their designee**

- a) This section will be completed by MQD staff or his/her representative when performing medical reviews or an independent professional review.
- b) The Consultant will indicate the determination of level of care and the effective date. Approval, when granted, is for the indicated level of care and medical care. It does not establish eligibility for the Medicaid Program or authorize payment for care. Payment is contingent on the patient being eligible under the Medicaid Program, the services being a benefit of the Program, and the provider of service being Medicaid certified and eligible to administer the level of care at the time services are rendered.
- c) The DHS or their designee will sign and date the form. Medical authorization for admission expires thirty (30) days from the date of approval.
- d) Upon completion of the form by the DHS or their designee, an approved

copy will be forwarded to the Medicaid Fiscal Agent as well as another copy returned to the sender, or, if the person is in a medical facility, to the long-term care institution, or as requested by an appropriate note on the form.

- e) If an applicant's medical condition does not meet Hawaii Medicaid criteria for admission or continued stay at a nursing/long term care level of care, DHS or their designee will fax the denied 1147 to the requesting agency and will mail out a certified denial letter to the client with copies to the facility, physician, and MQD.
- f) DHS or their designee will also deny any 1147 in which the referring agency did not submit requested additional documentation within thirty (30) calendar days of DHS' or their designee's request for documentation to support the level of care determination.

### **12.4.3 Authorization Period**

Medical authorization for admission expires 30 days from the date of approval. If the 30-day authorization period expires before the patient is admitted or transferred; a new Form 1147 should be submitted to MQD with a copy of the old form. A statement such as "For Updating" should be prominently written on the form to avoid confusion in handling.

### **12.4.4 Payment Requirement**

Approval of the patient's admission or transfer is not an authorization for payment or an approval of charges. All payments by the Medicaid Program are dependent on the following criteria:

- The patient must be eligible under the Medicaid Program at the time services are rendered.
- The provider of the service must be approved for Medicaid participation by DHS to render the approved services to Medicaid clients.

### **12.4.5 Form Availability**

The Long Term Care Evaluation form 1147 and instructions can be found in Appendix 4 or at <http://www.med-quest.us/mqdfoms.html>.

## **12.5 PRE-ADMISSION SCREENING AND RESIDENT REVIEW (PAS/RR)**

### **12.5.1 Description**

- a) Level C (SNF) and Level A (ICF) Nursing facilities must not admit any individual with a serious mental illness (SMI), or intellectual disability (ID) or developmental disability (DD) unless the state Behavior health authority has determined, prior to admission, that the individual requires the level of services provided by a nursing facility and if so, whether the individual requires specialized services.
- b) Preadmission Screening and Resident Review (PAS/RR) is a requirement for Level C and A nursing facility Medicaid participation and, therefore, a nursing facility is subject to withdrawal or recovery of Medicaid payment or decertification action for failure to perform PAS/RR for all individuals.
- c) PAS/RR involves three distinct processes:
  - **Level I** requires the identification of individuals with SMI or DD/ID;
  - **Level II** requires evaluation of individuals suspected of having SMI or DD/ID by the Department of Health/Adult Mental Health Division (DOH/AMHD) or the Department of Health/Developmental Disabilities Division (DOH/DDD); and
  - Notification of the DOH/AMHD or DOH/DDD promptly after a change in the physical or mental condition of nursing facility residents with or without a diagnosis of SMI or DD/ID.
- d) For PAS/RR Level I Screen, Form DHS 1178, instructions, definitions, and flow chart of the PAS/RR process, refer to Appendix 5.

### **12.5.2 PAS/RR Level I**

- a) The Level I process involves the identification of individuals suspected of having SMI or DD/ID that would involve further screening (Level II).
- b) All individuals (regardless of payment source and known diagnoses) who apply as a new admission to a Medicaid certified nursing facility must have a Preadmission Screening Resident Review (PAS/RR) Level I Screen, Form DHS 1178 completed by the attending physician (MD or DO), hospital discharge planner registered nurse (RN) or an advanced practice registered nurse (APRN).
- c) There are three exceptions to having a completed Level I Screen:

**LONG TERM CARE**

- Acute care patients who are admitted to a nursing facility directly from the hospital for continuing care of their acute care condition and the attending physician certifies prior to admission that they will require less than thirty days of care in the nursing facility;
- Individuals readmitted to a nursing facility from a hospital to which he/she was transferred for care; and
- Individuals transferred from one nursing facility to another nursing facility with or without an intervening acute hospital stay. The transferring facility is responsible for ensuring that the most recent PAS/RR forms accompany the transferring resident.

d) An individual may be admitted to a nursing facility if:

- The Level I Screen is negative for SMI or DD/ID; or
- If no referral for Level II evaluation and/or determination is necessary at this time.

**12.5.3 PAS/RR Level II**

- a) The Level II process involves the performance of necessary evaluation(s) and/or determination of need for nursing facility placement and specialized services.
- b) All individuals (regardless of payment source) that are suspected of having SMI on Level I screening must be referred to the Department of Health/Adult Mental Health Division (DOH/AMHD), for diagnostic evaluation and determination of need for nursing facility services and specialized services. All individuals (regardless of payment source) that are suspected of having DD/ID must be referred to the Department of Health/Developmental Disabilities Division (DOH/DDD) for diagnostic evaluation and determination of need for nursing facility services and specialized services. Individuals with a dual diagnosis (SMI and DD/ID) must be referred to both authorities concurrently.
- c) Written notice to the individual or his/her legal representative that the individual is suspected of having SMI and/or DD/ID and is being referred to AMHD and/or DDD must be provided.
- d) The following SMI or DD/ID individual who is not a danger to self or other and requires nursing facility services, but does not require specialized services need not be referred for Level II evaluation and determination:
- An individual who is being discharged from an acute care hospital and admitted

**LONG TERM CARE**

to a nursing facility for recovery from an illness or surgery for a period not to exceed one hundred twenty (120) days;

- An individual who is certified by a physician to be terminally ill with a medical prognosis for life expectancy of six (6) months or less;
  - An individual who is comatose, ventilator dependent, functioning at a brainstem level, or diagnosed as having a severe physical illness which results in a level of impairment so severe that the person cannot be expected to benefit from specialized services;
  - An individual requiring provisional admission pending further assessment in cases of delirium where an accurate diagnosis cannot be made until the delirium clears;
  - An individual requiring provisional admission not to exceed seven (7) days for further assessment for emergency situations requiring protective services; and
  - An individual requiring admission for a brief stay up to thirty (30) days to provide respite to caregivers to whom the individual is expected to return following the nursing facility stay.
- e) DOH/AMHD and/or DOH/DDD should make the following written determinations (using forms described in the policy and procedures of AMHD and/or DDD):
- The individual is or is not SMI or DD/ID;
  - The individual requires or does not require specialized services; and
  - Nursing facility placement is or is not appropriate.
- f) The written notice should be sent to the evaluated individual and his/her legal representative, the admitting or retaining nursing facility, the attending physician and the discharging hospital. The notice should include whether nursing facility level of service is needed, whether specialized services are needed, the placement options that are available consistent with the determination and the right of the individual to appeal the determination.
- g) If the individual or his/her legal representative requests an appeal of the determination, the DOH/AMHD and/or DOH/DDD appeal process should be used.
- h) An individual may be admitted to a nursing facility if it is determined that:
- the individual does not have a diagnosis of SMI, ID, or DD or

- the individual has a diagnosis of SMI, ID, or DD and it is evaluated/determined that nursing facility level of service is needed and specialized services are not needed.
- i) An individual may not be admitted to a nursing facility and alternative placement options discussed with the individual and his/her representative if it is determined that:
- nursing facility level of service is not needed and specialized services are not needed;
  - nursing facility level of service is not needed and specialized services are needed; or
  - nursing facility level of services is needed and the individual also requires specialized services.

#### **12.5.4 Annual Resident Review (ARR)**

- a) The implementation of Public Law 104-315, an amendment to Title XIX of the Social Security Act (the Act) which was signed on October 19, 1996, repealed the requirements for annual resident reviews (ARRs) of residents in long-term care facilities. Instead of ARRs, the nursing facility should notify the State Department of Health/Adult Mental Health Division (DOH/AMHD) and/or the State Department of Health/Developmental Disabilities Division (DOH/DDD) promptly after a significant change in the physical or mental condition of a resident. A review and determination should be done promptly after a nursing facility has notified the DOH/AMHD and/or DDD. This review and determination would apply to a significant change that results in a new suspected diagnosis of SMI or DD/ID or in a change in the previous determinations concerning specialized services needs or nursing facility care. "Previous determinations" refers to those residents who were diagnosed as SMI or DD/ID through the Level II process at a previous time.
- b) A significant change in the resident's condition which would be sufficient to require a review by the nursing facility would involve any of the following:
- Use of a psychiatric or psychological consultation to effectively treat/care for behavioral changes observed in the resident or use of other consultants (i.e., physical or speech therapist) to evaluate/treat for physical changes in the resident;
  - Initial prescription of a psychotropic medication to effectively treat/care for behavioral changes observed in the resident or change in prescription of a

psychotropic agent or other medication(s) to treat/care for behavioral/physical changes observed in the resident;

- An update or revision in the resident's care plan to effectively treat/care for behavioral/physical change.
- c) Nursing facilities have a maximum of twenty-one (21) days to begin treatment, attempt to stabilize a resident, or develop a revised care plan and determine whether the changes in the resident's condition merit a review by the State DOH. The standard of "promptness" for the State after notification by the nursing facility continues to be an annual average of seven (7) to nine (9) working days.

#### **12.5.5 Hawaii ePASRR Application**

- a) ePASRR is a secure Web application for submission of Level I PASRR forms, Level II evaluations, and Level II determinations by Adult Mental Health Division (AMHD) and Developmental Disabilities Division (DDD).
- b) Effective December 2017 for neighbor island hospitals and nursing facilities and February 2018 for Oahu hospitals and nursing facilities, all Level I PASRR forms and Level II evaluations shall be submitted in the Hawaii ePASRR application.
- c) When an individual is admitted to a nursing facility, the resident's name, Medicaid ID (if applicable), date of birth, and admission date should be recorded on the Monthly Census Report. The Monthly Census Report shall include all admissions to the nursing facility during the month and shall be submitted in the ePASRR application by the 15th day following the end of the reporting month. A sample of the Monthly Census Report, DHS 1137, is in Appendix 5.
- d) Registration for an account and access to ePASRR can be obtained at <https://epasrr.hsaq.com>

## **12.6 INCIDENT REPORTS**

---

### **12.6.1 Description**

- a) Providers of long-term institutional services shall submit to the Department a written incident report for each incident that results in harm to a Medicaid client. These reportable incidents include reaction to a drug or therapy, all bodily injuries that require medical intervention or absence without leave for one or more nights. An incident shall be in writing and shall be submitted to the department within seventy-two hours of a reportable incident. (Refer to reporting requirements below.)
- b) Only reports of “reportable incidents” should be submitted to MQD/HCSB. To reiterate, reportable incidents include:
- Adverse reaction to a drug or treatment. Adverse reaction or injury resulting from medication errors should also be reported.
  - Bodily injuries requiring medical intervention. In addition to treatment of the injury, medical intervention includes diagnostic assessment such as radiological procedures and laboratory studies, emergency room visits, physician assessments, and hospitalization. At the time of submission or as an addendum to the initial incident report, results of a diagnostic assessment should be provided so that the Health Care Services Branch (HCSB) can assess the actual extent of injury. Reports should be submitted within seventy-two (72) hours of the incident. This should allow enough time to include the results of a preliminary diagnostic assessment with the initial report.
  - Absence without leave, i.e., without physician orders for one or more nights.
- c) Non-reportable incidents include:
- Medication errors that do not result in injury or adverse reaction.
  - Bodily injuries such as minor skin tears and bruises, which do not require significant medical intervention. If these injuries are a result of suspected abuse, mistreatment or neglect, then it should be reported to the Adult Protective Service (APS) and the Department of Health (DOH) Survey and Certification Agency.
  - Cases of abuse, mistreatment or neglect between residents and between resident and staff. These reports should be sent to APS, DOH, and/or the Medicaid Investigation Division (MID).

- d) If reports of “reportable incidents” have been submitted to other agencies, this should be stated in the report to MQD/HCSB.

### **12.6.2 Reporting Requirements**

- a) The form **DHS 1147i** is to be used for the reporting of incidents. However, if a facility chooses not to use this form, it may do so provided that all the required information is included. A copy of this form is included in Appendix 5.
- b) Do not submit copies of a facility’s internal incident reports. The submission of such reports does not constitute acceptable reporting.
- c) Written reports shall include the following:
- 1) Name of the NF or ICF-ID;
  - 2) Name, age, and birthdate of the resident;
  - 3) Resident’s diagnosis;
  - 4) Resident’s acuity level at time of incident;
  - 5) Date, time, and place of the incident;
  - 6) Description of how the incident occurred;
  - 7) Description of the kind and extent of medical intervention; and
  - 8) Date incident report was written and signature and title of the reporting individual.
- d) If a facility does not have any reportable incidents in a quarter, this should be reported to the HCSB by the fifteenth (15th) day of the month following the quarter. The absence of incidents can be reported using the attached form (see bottom of form DHS 1147i). The form DHS 1147i is to be used for the reporting of incidents. However, if a facility chooses not to use this form, it may do so provided that all the required information is included. A copy of this form is included in Appendix 5.

## **12.7 MEDICAID CLIENTS IN LONG TERM CARE – RESIDENT RIGHTS AND OBLIGATIONS**

---

### **12.7.1 Description**

- a) The Omnibus Budget Reconciliation Act of 1987 (OBRA 87) requires the State Agency to make known and distribute to all nursing facilities participating in the Medicaid Program written notice of Resident Rights and Obligations while in a nursing facility. These rights became effective on April 1, 1988.
- b) These Rights are to be made available to the resident at the time of admission and periodically during a resident's stay in a nursing facility. The Medicaid Resident Rights and Obligations do not and should not supplant or supersede any Federal or State rights or obligation that are in effect at the time for residents in a nursing facility. Rather, the "Medicaid Resident Rights and Obligations" was meant to complement and strengthen all or any rights afforded to a resident in a nursing facility.

### **12.7.2 General Rights**

- Right to choose a personal attending physician and to be fully informed in advance about care and treatment and of any changes in care or treatment that may affect his/her well being.
- Right to participate in planning care and treatment or changes in care or treatment (unless the resident is judged incompetent).
- Right to be free from physical or mental abuse, corporal punishment, involuntary seclusion, and any physical or chemical restraints imposed for purposes of discipline or convenience and not required to treat medical symptoms. Restraints may only be imposed:
  - a) To ensure the physical safety of the resident, other residents and others, and
  - b) Only upon the written order of a physician that specified the duration and circumstances under which restraints are to be used, but the duration must be in compliance with facility certification standards. Exception: under emergency circumstances until a written physician order could reasonably be obtained.
- Right to privacy with regard to accommodations, medical treatment, written and telephonic communications, visits, and meetings of family and of resident groups.

**LONG TERM CARE**

- Right to confidentiality of personal and clinical records and to approve or refuse their release to any individual outside the facility, except, in cases of transfer to another health care institution, or as required by law or third party payment contract.
- Right to reside and receive services with reasonable accommodations of individual needs and preferences, except when the health or safety of the individual or other residents would be endangered.
- Right to receive notice before the room or roommate of the resident in the facility is changed.
- Right to voice grievances with respect to treatment or care that is (or fails to be) furnished without discrimination or reprisal for voicing the grievances, and the right to prompt efforts by the facility to resolve grievances the resident may have, including those with respect to the behavior of other residents.
- Right of the resident to organize and participate in resident groups in the facility and the right of the resident's family to meet in the facility with the families of other residents in the facility.
- Right of the resident to participate in social, religious, and community activities that do not interfere with the rights of other residents in the facility.
- Right to examine, upon reasonable request, the results of the most recent survey of the facility conducted by the Secretary or a State with respect to the facility and any plan of correction with respect to the facility.
- Right to be informed orally and in writing at the time of admission to the facility and periodically during his/her stay of his/her legal rights at the facility.
- Right to a written statement of resident rights upon reasonable request. The written statement shall include a description of the protection of personal funds and a statement that complaints may be filed with the State survey agency regarding resident abuse and neglect and misappropriation of resident property.
- Right to be informed at the time of admission, or if later, at the time eligibility for medical assistance is determined of the items and services included in the nursing facility services for which he/she may not be charged.
- Right to be informed in writing before or at the time of admission and periodically during his/her stay, of services available in the facility and of related charges for such services, including any charges for services not

**LONG TERM CARE**

covered by Medicaid, Medicare or by the facility's basic per diem charge.

- Right to apply for Title XIX medical benefits free from threats of discouragement by anyone in the facility.
- Right to proper written and oral information about 'how' to apply for and use Title XIX Medicaid benefits.
- Right to admission in a nursing facility without requiring third party coverage and without obligation, solicitation or coercion into making gifts, monetary donations or other forms of consideration as a precondition for admittance into the nursing facility, or for continued stay in the facility.
- Right to manage his/her own personal funds while in a nursing facility, or to have the facility manage the funds. Once the facility accepts the resident's written authorization to manage personal funds, the nursing facility must:
  - a) provide a full and complete separate accounting, including a written record of all financial transactions;
  - b) deposit personal funds in excess of \$50.00 in an interest bearing account separate from the facility's operating accounts and credit interest to the resident's account;
  - c) provide reasonable access to written records of all financial transactions;
  - d) give notice of the fact that the amount in the account may jeopardize eligibility for medical assistance; and
  - e) promptly convey upon the resident's death the personal funds to the individual administering the resident's estate.
- Right to deny or withdraw consent to reasonable access by any entity or individual that provides health, social, legal or other services to the resident.
- Right to equal access regarding transfer, discharge and the provisions of services required under the State Plan regardless of the source of payment.
- Right to immediate visitation by any representative of the Secretary, the State, by an ombudsman, or physician, right to immediate visitation by family, relatives, and other visitors (subject to reasonable restrictions) and the resident's right to deny or withdraw consent.

**LONG TERM CARE**

- Right to remain in this facility. The resident may be transferred or discharged only for certain reasons and with proper notice. These reasons are:
  - a) resident's welfare cannot be met in the facility;
  - b) resident's health has improved so the resident no longer needs the services provided by the facility;
  - c) resident's safety in the facility is endangered;
  - d) resident has failed, after reasonable and appropriate notice, to pay, or to have paid by Medicare or Medicaid, an allowable charge imposed by the facility; and
  - e) the facility ceases to operate.
- Right to appeal, under the State established appeal process, the transfer or discharge (effective 10/01/89), and to be provided the name, mailing address, and telephone number of the State Long Term Care Ombudsman or if the resident is developmentally disabled or mentally ill, the mailing address and telephone number of the State Protection and Advocacy Agency.
- Right to (the facility must provide the resident with) sufficient preparation and orientation to assure an orderly and safe transfer or discharge.

Before the resident is transferred, and also at the time of transfer, for hospitalization or therapeutic leave, the facility must provide written information to the resident and a known family member or legal representative concerning the duration of the period, if any, during which the resident will be permitted to return and resume residence in the facility and the policies of the facility regarding such a period.

If such leave exceeds a period (if any) paid for under the State Plan, the resident will be permitted to return to the facility immediately upon the first availability of a semi-private room if at that time the resident requires the services provided by the facility.

- Right to the following conditions for the administration of psychopharmacologic drugs:
  - a) Administered only on the orders of a physician and only as part of a written plan of care;

- b) Designed to eliminate or modify the symptoms for which the drugs are prescribed; and
  - c) Only if, at least annually, an independent external consultant reviews the appropriateness of the drug plan.
- Right to any other right established by the Secretary.

### **12.7.3 Rights of Incompetent Residents**

The rights of residents judged incompetent under State law shall be exercised by the person appointed by the court to act on the resident's behalf.

**STATE OF HAWAII**

**Department of Human Services**

**Med-QUEST Division**

<b>PREADMISSION SCREENING RESIDENT REVIEW (PAS/RR)  LEVEL I SCREEN</b>	<b>PATIENT'S NAME: (Last Name, First, M.I.)</b>	<b>DATE OF BIRTH: (MM/DD/YY)</b>
	<b>PRIMARY DIAGNOSIS:</b>	<b>MEDICAID I.D. NUMBER:</b>
	<b>REFERRAL SOURCE: (Physician's Name; Nursing Facility; Hospital; Etc.)</b>	

**PART A: SERIOUS MENTAL ILLNESS (SMI):** **YES**    **NO**

1. The individual has a current diagnosis of a Major Mental disorder and/or a Substance Related disorder, which seriously affects interpersonal functioning (difficulty interacting with others; altercations, evictions, unstable employment, frequently isolated, avoids others), and/or completing tasks (difficulty completing tasks, required assistance with tasks, errors with tasks; concentration; persistence; pace), and/or adapting to change (self-injurious, self-mutilation, suicidal, physical violence or threats, appetite disturbance, hallucinations, delusions, serious loss of interest, tearfulness, irritability, withdrawal): ( ) ( )
  - a. A **SCHIZOPHRENIC** disorder, **MOOD** disorder, **DELUSIONAL (PARANOID)** disorder, **PANIC OR OTHER SEVERE ANXIETY** disorder, **SOMATOFORM** disorder, **PERSONALITY** disorder, **SUBSTANCE RELATED** disorder or **PSYCHOTIC** disorder not elsewhere classified that may lead to a chronic disability; **BUT**
  - b. **NOT** a primary or secondary diagnosis of **DEMENTIA**, including **ALZHEIMER'S DISEASE OR A RELATED DISORDER**.
2. Does the SMI individual have Dementia? If yes, include evidence/presence of workup, comprehensive mental status exam. ( ) ( )
3. Has psychoactive drug(s) been prescribed on a regular basis for the individual within the last two (2) years with or without current diagnosis of SMI ? ( ) ( )

**PART B: INTELLECTUAL DISABILITY/DEVELOPMENTAL DISABILITIES (ID/DD):** **YES**    **NO**

1. The individual has a diagnosis of **ID** or has a history indicating the presence of **ID prior** to age 18. ( ) ( )
2. The individual has a diagnosis of **DD/related condition** (evidence/affects intellectual functioning, adaptive functioning; autism, epilepsy, blindness, cerebral palsy, closed head injury, deaf) or has a history indicating the presence of **DD prior** to age 22. Age of diagnosis/presence: \_\_\_\_\_ ( ) ( )
3. Does the ID/DD individual have a primary diagnosis or presence of **Dementia**? If yes, include evidence/presence of Dementia work-up, comprehensive mental status exam, if available. ( ) ( )
4. The individual has functional limitations relating to **ID/DD** (mobility, self-care/direction, learning, understanding/use of language, capacity for living independently). ( ) ( )
5. The individual received/receives **ID/DD** services from an agency serving individuals with ID/DD; (past and/or present; referred/referrals). Describe past AND present receipt of services and referrals made from agencies that serve individuals with ID/DD. \_\_\_\_\_ ( ) ( )

**DETERMINATION:**

1. If any of the answers in Parts A or B are **YES, COMPLETE PART C (page 2)** of this form.
2. If **all** of the answers in Parts A or B are **NO, SIGN and DATE BELOW:**

<b>LEVEL I SCREEN IS NEGATIVE FOR SMI OR ID/DD THE PATIENT MAY BE ADMITTED TO THE NF:</b>	<b>DATE AND TIME COMPLETED:</b>
_____	_____
<b>SIGNATURE OF PHYSICIAN, APRN, RN</b>	<b>MM/DD/YY</b>
_____	_____
<b>PRINT NAME</b>	<b>Time</b>
_____	_____

**PART C:**

**YES**

**NO**

- 1. Is this individual being discharged from an acute care hospital and admitted to the NF for recovery from an illness or surgery **not to exceed 120 days** and is not considered a danger to self and/or others? ( ) ( )
- 2. Is this individual **certified** by his physician to be terminally ill (**prognosis of a life expectancy of 6 months or less**) and is not considered a danger to self and/or others? ( ) ( )
- 3. Is this individual comatose, ventilator dependent, functioning at the brain stem level or diagnosed as having a **severe physical illness**, such as, COPD, Parkinson's Disease, Huntington's Chorea, or amyotrophic lateral sclerosis; which result in a level of impairment so severe that the person cannot be expected to benefit from specialized services? ( ) ( )
- 4. Does this individual require **provisional admission** pending further assessment in cases of delirium where an accurate diagnosis cannot be made until the delirium clears? ( ) ( )
- 5. Does this individual require **provisional admission which is not to exceed 7 days**, for further assessment in emergency situations that require protective services? ( ) ( )
- 6. Does this individual require admission for a **brief stay of 30 days for respite care**? The individual is expected to return to the same caregivers following this brief NF stay. ( ) ( )

**CHECK ONLY ONE:**

[ ] If **any** answer to Part C is **Yes**, **NO REFERRAL for LEVEL II evaluation and determination is necessary at this time. NOTE TIME CONSTRAINTS!**

[ ] If **all** answers to Part C are **No**, **REFERRAL for LEVEL II evaluation and determination MUST BE MADE.**

SIGN and DATE this form.

**INSTRUCTIONS**  
**DHS 1178 (Rev. 09/15)**

**PREADMISSION SCREENING RESIDENT REVIEW (PAS/RR) LEVEL I SCREEN**

1. **FORM: PREADMISSION SCREENING RESIDENT REVIEW (PASRR) LEVEL I SCREEN**

- a. This form shall be used as a uniform preadmission screening tool to identify serious mental illness (SMI) or Intellectual Disabilities/Developmental Disabilities (ID/DD) individuals or individuals with both conditions.
- b. This form shall be completed by the applicant's *attending or primary care physician, advance practice registered nurse, or registered nurse (discharge planner in hospital only)*.
- c. ALL applicants for admission to a Medicaid certified NF shall have a "PREADMISSION SCREENING RESIDENT REVIEW LEVEL I SCREEN" form completed prior to admission. The date of the PASRR Level I screen is no later than the day of admission to the facility for compliance.
- d. Copies of this form and all attachment(s) as appropriate shall be submitted with the facility's monthly census report for all admissions to:  
Contract Monitoring and Compliance Section  
Health Care Services Branch  
Med-QUEST Division  
P.O. Box 700910  
Kapolei, Hawaii 96709-0190

2. **INSTRUCTIONS FOR USING THE LEVEL I SCREEN FORM**

Each question listed under the two (2) major sections of PART A: Serious Mental Illness (SMI), Part B: Intellectual Disabilities/Developmental Disabilities (ID/DD) must be answered as directed before the section on Determination can be completed:

- (1) PART A: Serious Mental Illness
  - (a) The individual has a current diagnosis of serious mental illness as listed under the broad diagnostic categories defined in the "Diagnostic and Statistical Manual of Mental Disorders, 3<sup>rd</sup> Edition, Revised (DSM-III-R)" of SCHIZOPHRENIA, MOOD DISORDER, DELUSIONAL (PARANOID) DISORDER, PANIC OR OTHER SEVERE ANXIETY DISORDERS, SOMATIFORM DISORDERS, PERSONALITY DISORDERS, SUBSTANCE RELATED DISORDER, OR PSYCHOTIC DISORDERS NOT ELSEWHERE CLASSIFIED that may lead to chronic disability;
  - (b) The level of impairment seriously affects the individual's inter-personal functioning:
    - (i) Difficulty interacting appropriately and communicating effectively with other persons, possibly has history of altercations, evictions, unstable employment, frequently isolated, avoids others.
    - (ii) Has serious difficulty in completion of tasks in work, re-

- quires assistance with tasks, errors with tasks, concentration, persistence, or pace.
  - (iii) Has serious difficulty in adapting to change such as suicidal self-injurious, self-mutilation behavior, physical violence or threats, having appetite disturbance(s), hallucinations, delusions, serious loss of interest/withdrawals, tearfulness, and irritability.
- (c) FOR PASRR PURPOSES ONLY: Individuals with a primary or secondary diagnosis of SMI (ONLY) under Dementia as defined in the DSM-III-R (including Alzheimer's disease or a related condition) will not be considered as SMI and is excluded from the Level II process:
- (i) The individual has a current diagnosis of dementia (including Alzheimer's Disease or a related disorder) as defined in the DSM-III-R;
  - (ii) Meets the diagnostic criteria for dementia. For, e.g., there are global impairments of cognitive functioning; personality changes; and disturbances in behavior and affect; and social and occupational functioning; and
  - (iii) There should be collaborative evidence to include a comprehensive mental status exam from the history, physical examination, or laboratory tests to support the diagnosis.
  - (iv) In the absence of such evidence an organic factor can be presumed if the disturbance can't be accounted for by a functional mental disorder.
- (d) Psychoactive Drugs within the last two (2) years
- (i) Refers to drugs that affect the mind and behavior:
  - (ii) Examples of classes of psychoactive drug include: antipsychotic, antidepressant and anti-anxiety drugs;
  - (iii) The prescription of a psychoactive drug on a regular basis in the absence of a neurological disorder is an indication that Level II screening is necessary; and
  - (iv) Evidence of psychoactive drug use alone need not be taken as an indication that further review is needed when there is a medical diagnosis and justification for its use that is not in connection with a mental disorder. For e.g., the use of Valium as an adjunct in seizure disorders, such as, epilepsy.
- (2) PART B: Intellectual Disabilities/Developmental Disabilities (ID/DD)
- /Related Conditions:
- (a) Level of intellectual disabilities (mild, moderate, severe, or profound) described in the *American Association on Mental Retardation's Manual on Classification in Mental Retardation (1983)* manifested before age 18; or  
Related conditions refers to severe, chronic disability, such as, CP, epilepsy or autism that is attributed to a mental or physical impairment or combination of mental and physical impairments, is manifested before age 22, is likely to continue indefinitely, and results in substantial functional limitations in three or more areas of major life activities (mobility, self-care/direction,

learning, understanding/use of language, capacity for living independently).

- (b) There should be collaborative evidence if an ID/DD individual has or have presence of Dementia (including Alzheimer's disease or a related condition) as these individuals are NOT excluded from PASRR.
  - (c) Indicate if the individual is receiving ID/DD services.
- (3) **DETERMINATION:** The decision made in the *Determination* section must be based on the answers and corresponding evidence given on **PART A: SERIOUS MENTAL ILLNESS (SMI)** or **PART B: INTELLECTUAL DISABILITIES/DEVELOPMENTAL DISABILITIES (ID/DD)** in order to be valid:
- (a) If **ALL** of the answers in PARTS A or B are “**NO**”, **SIGN** and **DATE** in the box indicating the Level I Screen is **NEGATIVE** for **SMI** or **DD/ID**.
  - (b) If **ANY** of the answers in PARTS A or B are “**YES**”, **COMPLETE PART C (backside)** of this form.
  - (c) **PART C:** are conditions that make an exception for the SMI or DD/ID individual from going on to the Level II evaluation and determination process:
    - (i) Items #1 through #6 are self-explanatory and are medical decisions made by the individual's attending or primary care physician.
    - (ii) If any answer to PART C is “YES”, no referral for Level II evaluation and determination is necessary at the time form is completed. **NOTE THE TIME CONSTRAINTS.**
    - (iii) If all of the answers to PART C are “NO”, a referral for Level II evaluation and determination must be made.
    - (iv) The attending physician must date and sign the form in the box provided at the bottom of the page to indicate that PART C is completed.

3. **THE LEVEL I SCREENING FORM IS AVAILABLE ONLY FROM THE:**
