## Early Intervention (EI) and QUEST Integration health plan (HP) Collaboration flowchart

El and HP collaborate through 2-way sharing of information as needed for health coordination. El contacts the HP 6 months prior to the child exiting the El program.

- If the child is exiting at age 3, contact when the child is 30 months old.

- If exiting prior to age 3, El contacts HP as soon as exit or transition plan is known.

If a family unexpectedly disengages from EI services, EI will inform the HP.

The HP will then conduct outreach to assess and address medical needs.

## HPs

- Participate in El transition processes

- Screen every child prior to exiting EI for Health Coordination needs.
