MEMORANDUM

<u>MEMO NO</u>. CCS-2405 QI-2409

TO:	Community Care Services (CCS) Behavioral Health QUEST Integration Health Plans
FROM:	Judy Mohr Peterson, PhD Med-QUEST Division Administrator

SUBJECT: SHAREINFO – NEW INSTRUCTIONS TO THE HEALTH PLANS

The purpose of this memo is to inform health plans that a routine extract of HPMMIS reference tables, known as ShareINFO, is now available on the Med-QUEST SFTP. These reference tables relate to the logic of certain HPMMIS edits for encounter data that have been specified in existing memos such as QI-2205/CCS-2204 (Requirements for Health Plans to Submit NDC Code and NCPDP Units on Encounters) and QI-2321 [Addendum to QI-1516]/FFS 23-10/CCS-2307 (Change to Status of Error Code D330).

## **Background:**

HPMMIS uses a number of reference tables to inform encounter edits that assess whether encounters meet requirements during adjudication. Med-QUEST has provided ad-hoc extracts of these reference tables to health plans in the past to help health plans align encounter requirements with the State. The ShareINFO package contains 9 zipped folders consisting of reference tables that may be used to understand encounter editing in HPMMIS.

Impact: Immediate

Appendix A contains the full list of reference tables, any extract specifications, and related encounter edits. Health plans should use the relevant reference tables to inform their internal claims payment edits for the related encounter edits specified in the "Related edit codes" column. For example, health plans should use RF724 where Entity Type = TIS to ensure claims meet the requirements of edit D330, specified in QI-2321 [Addendum to QI-1516] FFS 23-10 CCS-2307 (see Table N1, Appendix B).

The ShareINFO Guide has been created and it contains the file layouts for all tables in this ShareINFO memo. The guide is located with the Companion and Technical Guides at <u>Health</u> Plan Resources (hawaii.gov) under the Other Resources tab.

## Intermediate

The ShareINFO extracts will be generated on a bi-monthly basis, the 1st, and the 15th of each calendar month. The extract records will be pipe, "|", delimited .txt format. The extracts will include a Header and Trailer. The ShareINFO package may be found on the SFTP at HI/ShareINFO/Reference/PROD/OUT folder.

Med-QUEST will inform the health plans of adjustments to the ShareINFO tables or related edit codes.

## Future

Med-QUEST will continue to assess the encounter edits in place within HPMMIS to determine their need in conjunction with EDI front-end editing. *Currently, we ask health plans to limit questions on the ShareINFO reference tables to those with specified related edits (in other words, reference tables associated with one or more edits identified in the "Related Edit Codes" field in Appendix A).* Appendix B provides table layouts and data elements for the ShareINFO Guide and the 9 zipped files health plans have access to on the SFTP site. Health plans should *reach out to <u>mqd-encounters@dhs.hawaii.gov</u> with any questions.* 

Appendix A

Package	Table	Table Name	Table Specifications	Related edit codes
REFER01	RF123	PROCEDURE HAWI COVERAGE	Active status, valid PROC code on RF110; End Date ≥ 10/1/1989; Begin Date ≥ RF110 Begin Date; End Date ≥ RF110 End Date
