1 Introduction

Companion Documents

Companion Guides are intended to supplement the standard HIPAA Implementation Guides and are technical in nature. They are intended for technical staff members who are responsible for electronic transaction/file exchanges. This document provides specific information related to the fields and values reported.

Disclaimer

These specifications cover the required fields per the NCPDP Post Adjudication Transaction Standard Implementation Guide Version 2.2 as well as the required fields needed for claims processing by MQD. When additional segments and/or fields that are allowed within the supported NCPDP versions are provided, MQD will accept the transaction but only those segments and fields pertinent to claims processing will be utilized. Any NCPDP transaction that is not supported by MQD will be rejected.

MQD supports the following NCPDP transactions:

- Post Adjudication History

This Companion Document is intended to be a technical document describing the specific technical and procedural requirements for interfaces between MQD and its trading partners. It does not supersede either health plan contracts or the specific procedure manuals for various operational processes. If there are conflicts between this document and either the health plan contracts or operational procedure manuals, the contract or procedure manual will prevail.

Substantial effort has been taken to minimize conflicts or errors; however, MQD, the MQD Information Services Division, or its employees will not be liable or responsible for any errors or expenses resulting from the use of information in this document. If you believe there is an error in the document, please notify the MQD Information Services Division immediately

2. NCPDP Transactions

2.1 Overview

NCPDP Overview

The NCPDP PAH 2.2 transaction is used by the MQD contracted health plans to report post adjudicated pharmacy encounters.

MQD accepts NCPDP transactions from the contracted health plans, completes a validation check, translates files that pass validation and then forwards the file to the adjudication system for processing.

File Submission

To exchange electronic data with MQD, Trading Partners must establish individual user accounts to the secure file transfer protocol (SFTP, aka EFT). When permissions have been granted to the SFTP, Trading Partners will upload their NCPDP transactions for processing.

Validation

MQD currently only performs a basic syntactical validation on the NCPDP file; record count balancing and record length checking. Batch files should contain one header, one trailer (including count of records), and at least one detail record; there currently is no maximum limit of detail records. It is suggested that Trading Partners limit file sizes to less than 75 MB to facilitate faster file transfer.

Files that pass will be forwarded to the translator and the Trading Partner will receive a response file that starts with "HIENACK" indicating the file was accepted.

Files that fail validation will discontinue processing and the Trading Partner will receive a response file with a .REJECT extension.

Translation

Files that pass validation will be translated and sent to the adjudication system for processing.

Submission Schedule

Trading Partners can transmit NCPDP transactions to MQD at any time. MQD typically processes files each evening, Monday through Friday.

3 Technical Infrastructure and Procedures

3.1 Technical Environment

Connectivity

Authorized individuals from the Trading Partner organization may connect to the MQD SFTP using a standard internet browser. To obtain an individual SFTP account, the Electronic Data Exchange Request and External User Affirmation Statement forms must be completed and submitted to MQD Data Security. These forms can be obtained from the MQD website.

- **XXXXXX** - Six byte Health Plan Identifier
- **Environment**
Dev is for internal MQD development staff
Other is for sending/receiving large files that cannot be sent in an email or contains PHI.
Prod is for sending/receiving production files
Test is for sending/receiving test files
- **Type and Direction**
EDI-IN is for sending HIPAA X12 and NCPDP PAH 2.2 transaction files only. Zipped files will not be allowed.
EDI-OUT is for receiving HIPAA X12 NCPDP PAH 2.2 response files.
IN is for sending proprietary files.
OUT is for receiving proprietary files.

File Naming Conventions

File naming convention is as follows:

IDNCPDPCCYYMMDDA.txt

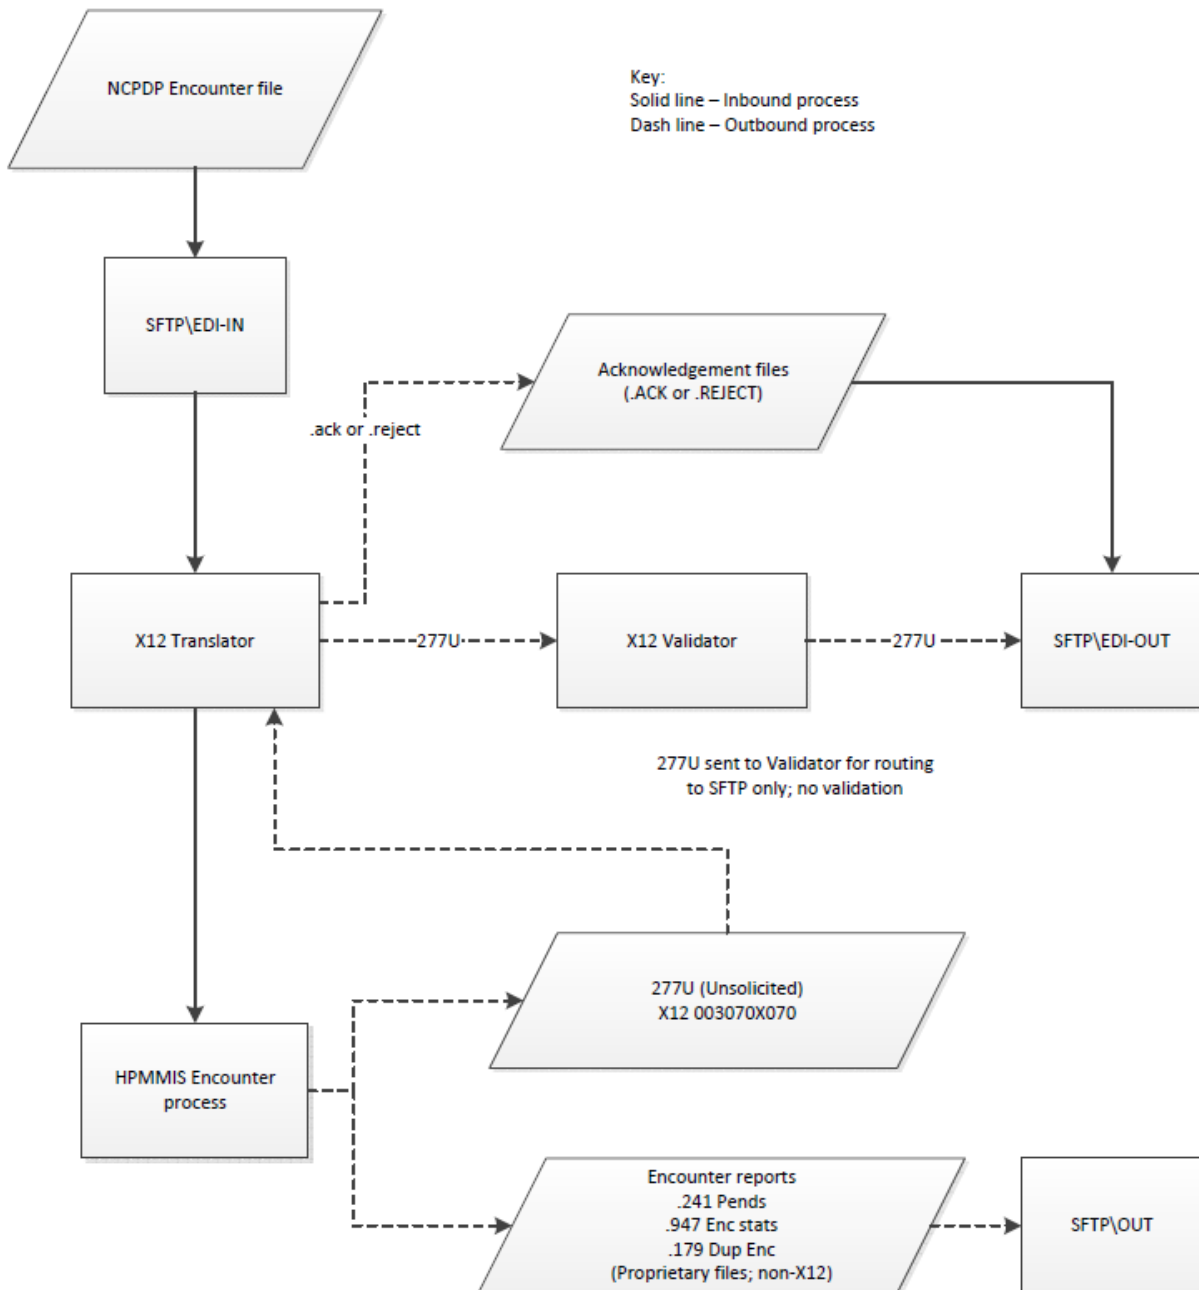

- **ID** - two character Health Plan Identifier
- **NCPDP**
- **CCYYMMDD** – processing date
- **A** – 1 character sequential letter to differentiate between multiple files submitted on the same day (i.e. A, B, C, ...)

Files should be rendered in a standard text file format and should not have a .tmp, .zip and/or any other application file extension.

Files that fail validation will discontinue processing and the Trading Partner will receive a response file with a .REJECT extension.

 *Note: You may need to search by the field name because the Field ID listed in the Transaction Notes and the IG will differ because the IG formats the 0 with a slash.
 - Example: 409-D9 from cannot be found because it would be listed as 4Ø9-D9 in the IG.
- **Field Name** – The Post Adjudication Transaction Standard Version 2.2 field name
- **Mandatory or Situational (M/S)** – Field designation, Indicates whether a field is mandatory or situational. Mandatory fields may be mandatory by the NCPDP PAH 2.2 Standard and/or required by the processor. If a field is situational and data does not exist for the field, the field **MUST** be populated with the appropriate padding;
 - a. **M** – Mandatory field
 - b. **S** – Situational field
- **Format** – Field format values
- **Size** – The field length size
 - a. **A/N** – Alpha/Numeric, upper case when alpha, always left justified, space filled, upper case, printable characters and default values of spaces;

 - Example: "D" fields of length 8 represent \$\$\$\$\$\$cc
- **Size** – The field length size
- **Start** – The starting position in the record of the field
- **End** – The ending position in the record of the field
