Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

1 Preface

1.1 Overview

This Health Plan Manual is directed to medical, dental, behavioral health plans and vendors (Trading Partners) that are contracted with the Hawaii Department of Human Services (DHS), Med-QUEST Division (MQD), to further their understanding of the Hawaii Prepaid Medical Management Information System (HPMMIS).

HPMMIS is operated and maintained by the State of Arizona Medicaid agency known as the Arizona Health Care Cost Containment System (AHCCCS) Administration. This manual contains the transaction data and the various processes to be used by Health Plans and Trading Partners to provide information to and receive information from MQD through HPMMIS.

1.2 Eligibility, Enrollment and Payment to Plan

Eligibility for medical assistance (QUEST and Fee-For-Service) is performed in the Hawaii Automated Welfare Information System (HAWI) and transmitted overnight to HPMMIS. The MQD Enrollment Call Center Section enters enrollment information into HPMMIS.

Historically, Med-QUEST has provided member-level enrollment and capitation information on both Daily and Monthly Health Plan Membership Roster Files. HIPAA standards require enrollment and capitation information to be transmitted on separate files composed of standard electronic transactions. To become HIPAA compliant, Med-QUEST has split the information contained in the Daily and Monthly Roster Files by including enrollment-related information in the 834 Enrollment Transaction and capitation payment related information in the 820 Capitation Payment Transaction.

In addition, Med-QUEST has moved information from other enrollment-related files, including the Med-QUEST TPL File, into the 834 Enrollment Transaction. The 820 Capitation Transaction extracts payment data from financial files built from the Hawaii Prepaid Medical Management Information System (HPMMIS). Med-QUEST 820 data is equivalent to the financial data that formerly appeared on Daily, Monthly and Mass Adjustment Rosters.

Last Update: 6.20.2008

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

1.3 Document Purpose

1.3.1 HIPAA Overview

The Administrative Simplification provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA, Title II) require the federal Department of Health and Human Services to establish national standards for electronic health care transactions and national identifiers for providers, health plans and employers. They also address the security and privacy of health data.

The intent of these standards is to improve the efficiency and effectiveness of the nation's health care system by encouraging widespread use of electronic data interchange in health care. The intent of the law is that all electronic transactions, for which standards are specified, must be conducted according to the standards.

Covered entities are required to accept HIPAA Transactions in the standard format in which they are sent and must not delay a transaction or adversely affect an entity that wants to conduct the transactions electronically. Both Med-QUEST and its health plans are HIPAA covered entities.

Last Update: 6.20.2008 7

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

1.3.2 Document Objective

This document provides information about the 834 Enrollment (Daily and Monthly Roster) and the 820 Capitation (Monthly Capitation Payment) Transactions that is specific to Med-QUEST and the ways in which Med-QUEST Trading Partners receive information from Med-QUEST.

1.3.3 Intended Users

This document is intended for members of the technical staff of Health Plans and Trading Partners who are responsible for electronic transactions and file exchanges.

1.3.4 Relationship to HIPAA Implementation Guides

The information in this document is intended to supplement the HIPAA Implementation Guides for each of the HIPAA transactions. Rules for format, content and field values can be found in the Implementation Guides. This document describes the technical interface environment with Med-QUEST, including connectivity requirements and protocols and electronic interchange procedures. This document also provides specific information on the fields and values required for transactions sent to or received from Med-QUEST.

The information in this document is not intended to:

- Modify the definition, data condition, or use of any data element or segment in the standard Implementation Guides.
- Add any additional data elements or segments to the defined data set.
- Utilize any code or data values that are not valid in the standard Implementation Guides.
- Change the meaning or intent of any implementation specifications in the standard Implementation Guides.

Last Update: 6.20.2008 8

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

1.3.5 Disclaimer

This document is intended to be a technical document describing the specific technical and procedural requirements for interfaces between Med-QUEST, Health Plans and Trading Partners. It does not supersede either health plan contracts or the specific procedure manuals for various operational processes.

Substantial effort has been taken to minimize conflicts or errors; however, Med-QUEST, the Med-QUEST Systems Office, or its employees will not be liable or responsible for any errors or expenses resulting from the use of information in this document. If you believe there is an error in this document, please notify the Med-QUEST Systems Office immediately.

1.3.6 Conventions Used in this Manual

Unless otherwise stated, the following terms are used in this manual as defined below.

DHS	Department of Human Services		
FTP	File Transfer Protocol		
HAWI	Hawaii Automated Welfare Information System		
Health plan	Health plans include medical, dental and behavioral health plans contracted with the State of Hawaii to provide services to eligible members.		
HPMMIS	The Hawaii Prepaid Medical Management Information System is based on the Arizona PMMIS and is operated and maintained by the State of Arizona for Hawaii.		
MQD	MQD is the Med-QUEST Division of the Hawaii Department of Human Services.		
MFIS	MFIS is the Member File Integrity Section in MQD, which resolves membership roster problems.		
TPL	Third Party Liability		
Trading Partners	External entities (such as medical, dental and behavioral health plans and other vendors) who exchange electronic files and transactions with Med-QUEST.		
VPN	Virtual Private Network

1.4 Contents of this Document

Preface

Section 1 provides general information on the HIPAA and proprietary files and the various processes to be used by external entities and outlines the information to be included in the remainder of the document.

Transaction Overview

Section 2 provides an overview of the 834 and 820 transactions including information on:

- The purpose of the transaction(s)
- The standard Implementation Guide for the transactions
- Replaced and impacted Med-QUEST files and processes
- Transmission schedules

Technical Infrastructure

Section 3 provides a brief statement of the technical interfaces required for trading partners to communicate with Med-QUEST via electronic transactions.

Transaction Standards

Section 4 provides information relating to the 834 and 820 transactions including:

- General HIPAA transaction standards
- Data interchange conventions applicable to the transactions
- Procedures for handling rejected transmissions and transactions

Transaction Agreements

Section 5 provides more specific information relating to the 834 and 820 transaction sets including:

- A statement of the purpose of transaction agreements between Med-QUEST and other covered entities
- Detailed Transaction Specifications that show how Med-QUEST populates the data elements in the 834 Enrollment and 820 Capitation Payment Transactions

Contacts

Section 6 provides contact information for Med-QUEST staff within the Systems Office (SO) and Membership File Integrity Section (MFIS).

Last Update: 6.20.2008

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

2 834 Enrollment and 820 Capitation Transactions

2.1 Electronic Membership Rosters

Eligibility for medical assistance (QUEST and fee-for-service) is performed in HAWI. Eligible QUEST clients then contact the Med-QUEST Enrollment Call Center to make their plan selections, which are entered into HPMMIS. If no plan selections are made within the established timeframes, HPMMIS auto-assigns the eligible QUEST clients to medical and dental plans (As of October 1, 2001, Dental services are provided to the clients by the Medicaid Fee-For-Service Program). When a QUEST member loses eligibility, HAWI sends a termination transaction to HPMMIS, which, in turn, generates a disenrollment transaction. HPMMIS generates daily and monthly electronic membership rosters containing new enrollments and disenrollments for the QUEST plans. Even if there are no transactions, daily files are generated for each plan. These files contain no transactions, but have a trailer record. This is to ensure the plans have not missed any files. The plans obtain the rosters via FTP. (Refer to section 3.4 Med-QUEST/Health Plans' File Transfers on page 25 for more information.)

The daily 834 contains information about new health plan enrollees, identifies changes to current enrollees and provides disenrollment dates.

Health plans are required to load the daily 834 which contain three types of transactions:

Add (Enrollment) Transactions

When an individual is enrolled in a plan, the plan receives an add transaction with an enrollment begin date. The action code identifies, in general, the reason the client is being added to the plan's membership. Blocks of enrollment to correct errors include begin and end dates that span the period of enrollment.

Change Transactions

Demographic changes are identified on the daily 834s as changes and do not affect enrollment or capitation for the current month. Action codes identify the type of information that has been changed. Rate code changes, which result in capitation changes, are always sent as separate change transactions with action code "RC" and are effective from the first of the next month. Changes in programs and categories are sent as a termination and an add transaction.

Island moves are an exception, where it is not considered as a 'change'. A disenrollment transaction is sent to the old plan and an add transaction is sent to the plan when the client is enrolled on the new island. The Island Code on the address change record represents the original island.

Last Update: 6.20.2008 11

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

Disenrollment Transactions

When a client is disenrolled from a plan, the plan receives a disenrollment transaction with an enrollment end date. The action code identifies, in general, the reason the client is being disenrolled from the plan's membership. The end date of the enrollment is the last day of enrollment with the plan. Blocks of disenrollment include begin and end dates that span the period of disenrollment.

For additional details, a complete list of action codes is included in *Appendix B.9 Maintenance Type Codes and Action Codes*.

Health plans MUST process each day's transactions in the proper sequence. Processing transactions out of order, or failing to process a transaction, will cause the health plan to have incorrect enrollment information.

When an enrollment error is identified and corrected, HPMMIS sends the corrected enrollment to the health plan, eliminating the need for manual enrollment notification.

Last Update: 6.20.2008 12

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

2.2 Transaction Overview

2.2.1 Enrollment and Capitation Transactions

834 Enrollment Transaction

The 834 Enrollment Transaction is used to transfer enrollment information from the sponsor of the insurance coverage, benefits, or policy (Med-QUEST) to a health care payer (a Med-QUEST health plan). Enrollment in a particular Med-QUEST health plan differs from more general eligibility for Med-QUEST benefits. Under HIPAA, eligibility information is communicated by the 270/271 Eligibility Verification Transaction Set and detailed information on recipient enrollment in health plans or equivalent entities by the 834 Transaction.

Monthly 834 Transactions identify all active members of a health plan on a given date and are generated in association with monthly capitation prepayments. Daily 834 Transactions provide data on both an individual's initial enrollment and any data changes during enrollment. Daily 834 Updates generate Daily capitation payments for new health plan enrollees and positive and negative adjustments for retroactive enrollments, enrollment terminations and changes from one Rate Code to another. All capitation payments and subsequent adjustments to those payments that occur as a result of enrollment activity are reflected on the monthly 820 Capitation Transaction.

The Daily 834 Transaction is unique among HIPAA Transactions in that entities external to Med-QUEST (health plans) use data from it to update their systems. Monthly 834 Transactions are for purposes of audit and enrollment verification and are not intended for use in system updates.

With the implementation of HIPAA, 834 Transactions no longer contain information about TPLs that are not true TPLs. Health Plans should remove such TPL codes from their databases. For a complete listing of these codes, refer to *Appendix B.4: TPL Codes*.

820 Capitation Transaction

Med-QUEST makes capitation payments and generates 820 Transactions on a monthly basis. Monthly capitation pre-payments, payments and adjustments from Daily 834s and payments resulting from ad hoc mass adjustment runs are all processed in the monthly health plan payment cycle. Amounts deducted from or added to capitation payments due to such things as health plan sanctions or negotiated settlements are also reported on 820 transactions.

Last Update: 6.20.2008 13

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

ACS issues checks when it makes capitation payments on behalf of MQD. Each detailed payment documented on the 820 Transaction has a Voucher Number. The same Voucher Number can be associated with information for multiple members. This association makes it possible for receivers of both 820 and 834 Transactions to audit payments at the member level.

2.2.2 Processes Replaced or Impacted

The primary processes replaced by the 834 Enrollment and 820 Capitation Transactions are the Daily and Monthly Roster File interfaces.

834 Enrollment Transaction

Replaced Files

Daily and Monthly Roster Files (enrollment components)

Daily and Monthly TPL Roster Files

Impacted File

None

820 Capitation Transaction

Replaced Files

Daily and Monthly Roster Files (Capitation Payment components)

Impacted File

Mass Adjustment File

Payment amounts, check numbers and payment dates on monthly 820 Transactions must match corresponding information on the electronic payments or checks that Med-QUEST sends to health plans. Mass Adjustments are also handled on the 820 Capitation Transaction.

2.2.3 Other Related Information

Med-QUEST continues to produce several enrollment-related files in the Agency's proprietary format. These files do not make Med-QUEST recipients health plan members and do not require HIPAA Transaction and Code Set compliance.

Last Update: 6.20.2008 14

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

2.3 834 Enrollment Transaction

2.3.1 Purpose

The 834 Enrollment Transaction transmits enrollment information from the sponsor of the insurance coverage (Med-QUEST) to a health care payer (a Med-QUEST Health Plan) on a daily and monthly basis. The daily version of this transaction provides data on initial enrollments, enrollment terminations and subsequent changes to member-level enrollment data. The monthly version provides a listing of active members that is the basis for the health plan's monthly capitation pre-payment.

The Daily 834 Enrollment Transaction is used to identify:

- New members for whom the health plan is responsible
- Terminated or deceased members for whom the health plan is no longer responsible
- Demographic changes for each member such as changes in name, address or date of birth
- Other changes for each member such as changes in Rate Code or TPL coverage

The Monthly 834 Enrollment Transaction is used to:

- Reconcile health plan and Med-QUEST member files
- Audit updates to health plan data applied from Daily 834 Transactions during the previous month

Data Elements on both Daily and Monthly 834 Transactions carry Voucher Numbers when they result in capitation payments or adjustments. Corresponding Voucher Numbers also appear on the Individual Premium Remittance Detail segment of the 820 Capitation Payment Transaction and can be used to link enrollments to member level capitation payments.

2.3.2 Standard Implementation Guide

The standard Implementation Guide for the 834 Enrollment Transaction is the American National Standards Institute (ANSI) Accredited Standards Committee (ASC) X12 Transaction Set Implementation Guide for Benefit Enrollment and Maintenance and all approved Addenda.

Last Update: 6.20.2008 15

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

2.3.3 Related Transactions

As used by Med-QUEST, Transaction Specifications for the 834 Transaction are closely related to Transaction Specifications for the 820 Capitation Transaction. All member level capitation payments and adjustments correspond to monthly prepayments, new enrollments, enrollment changes, or mass adjustments due to retroactive rate changes for individual health plan members.

2.3.4 Transmission Schedules

The 834 Daily Enrollment Transaction file showing new members, disenrolled or deceased members and demographic or other changes to current members is produced daily including holidays and weekends. This file is generally available to the health plan on the Med-QUEST FTP Server based on the following schedule:

Available: Each morning

Available for: 7 days from the date of processing

The 834 Monthly Enrollment Transaction File containing a prospective roster of all currently active members is produced on the last day of each month and is generally available to the Health Plan on the Med-QUEST FTP Server based on the following schedule:

Available: The morning of the first day of the month

Available for: 30 days from the date of processing or until the next

Monthly 834 is generated.

The single 820 file that Med-QUEST sends to each health plan includes the current month's capitation pre-payments and adjustments accumulated during the previous month.

Last Update: 6.20.2008 16

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

2.4 Enrollment and Disenrollment

Enrollment and disenrollment transactions are sent on the daily 834s.

2.4.1 Enrollment Dates

The enrollment date is the first day of enrollment in a plan. Members may be enrolled on any day of the month. With the exception of newborns that are retroactively enrolled to their dates of birth, and PACE members who are retroactively enrolled upon admission, individuals are enrolled on the next calendar day after MQD accepts the client's plan selection or the client is auto-assigned.

2.4.2 Disenrollment Dates

The disenrollment date is the last day of enrollment in the plan, which, in most instances is the last day of the month. For example, enrollments ending on the last day of the month have end dates of 1/31/00, 2/29/00, etc. There may also be daily enrollment changes based upon MQD policies. For example, when a client becomes pregnant and moves from QUEST-Net to QUEST, the individual will be disenrolled from QUEST-Net and enrolled into QUEST. The disenrollment from QUEST-Net can become effective any day of the month.

Daily disenrollments (which may occur retroactively) are generally limited to clients changing from:

- QUEST-Net to QUEST
- QUEST-ACE to QUEST
- QUEST to FFS
- QUEST-Net to FFS
- QUEST-ACE to FFS
- QUEST to Foster Care Out-of-State (covered by FFS)
- Island Change

Retroactive disenrollments are currently limited to:

- Death
- Incarceration
- Admission to State Hospital
- Out of State
- Wait List

Last Update: 6.20.2008

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

2.4.3 Enrollment Corrections

There may be retroactive changes (blocks of enrollment and disenrollment) to correct enrollment errors.

See *Appendix A.1 Enrollment Corrections* for related examples of the following scenarios:

Example 1: Erroneous Date of Birth Example 2: Erroneous Date of Death

Example 3: Foster Care Client Sent Out-of-State

Last Update: 6.20.2008 18

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

2.5 820 Capitation Transaction

2.5.1 Purpose

The 820 Capitation Transaction is a monthly file that provides each Med-QUEST health plan with an electronic remittance advice for its capitation payments. Med-QUEST makes all capitation payments on a monthly basis with an electronic payment or check to each health plan. The Monthly 820 can accumulate and report capitation payments generated during the prior month by Daily 834s, Monthly 834s and Mass Adjustment runs. Settlements, financial sanctions and other payments to and recoupments from health plans that are not member specific can also be included on the 820.

The Med-QUEST Fiscal Agent, Affiliated Computer Services (ACS) produces checks to the Health Plans through the Financial System. ACS specifies the Check Numbers for each monthly payment. Check Numbers for the 820 are entered manually from ACS payment data.

The 820 Transaction is used to:

- Show monthly capitation pre-payments for each health plan member
- Show pro-rated payments for each health plan member who joined during the previous month
- Show positive or negative adjustments that reflect changes to previous capitation payments
- Show positive or negative payment adjustments based on retroactive capitation rate changes by Med-QUEST, usually done through a mass adjustment
- Show Med-QUEST payments and other adjustments that are not member specific.

2.5.2 Standard Implementation Guide

 The standard Implementation Guide for the 820 Transaction is the American National Standards Institute (ANSI) Accredited Standards Committee (ASC) X12 Transaction Set Implementation Guide for the Payroll Deducted and Other Group Payments for Insurance Products Transactions and all approved Addenda.

Last Update: 6.20.2008

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

2.5.3 Related Transactions

As used by Med-QUEST, Transaction Specifications for the 834 Transaction are closely related to Transaction Specifications for the 820 Capitation Transaction. All member level capitation payments and adjustments correspond to monthly prepayments, new enrollments, enrollment changes, or mass adjustments due to retroactive rate changes for individual health plan members.

2.5.4 Transmission Schedules

The 820 Capitation Transaction File is initiated by the Med-QUEST Finance Office and is available the next day to the health plans on the Med-QUEST FTP server.

Last Update: 6.20.2008 20

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

2.6 Capitation Rates and Payment

The specific capitation rate that a plan is paid for a particular member is determined by a combination of the rate and island codes. The rate and island codes are data values that appear on the Member Level Detail on the 834.

2.6.1 Enrollment Rate Codes

Rate codes reflect the risk adjustment groups for medical plans and adult/child distinction for dental plans. The rate code also identifies which clients have Medicare coverage for SMI behavioral health. The eligibility category (TANF, Foster Care, GA, QUEST, QUEST-Net, S-CHIP and Immigrant Children), gender and age are reflected in the rate codes when applicable. QUEST and QUEST-Net members are distinguished by different rate codes. For example, the rate for a newborn TANF male is a specific rate code. When a newborn is initially enrolled, this rate code is systematically associated with the enrollment. Assuming continued eligibility and enrollment of the newborn, HPMMIS calculates monthly capitation payment using this rate code and the island of residence through the end of the month of the newborn's first birthday. Refer to *Appendix B.8 Rate Code Summary*, for a complete list of enrollment rate codes.

2.6.2 Monthly Capitation Calculations

A prospective monthly capitation payment amount is calculated on the last processing day of the month for each eligible person enrolled on the first day of the following month. The monthly capitation is a set amount determined by rate code and island. It is not prorated for the number of days in the month.

2.6.3 Daily Capitation Calculations

The daily 834s identify the transactions which are comprised of capitation amounts associated with daily enrollment and disenrollment transactions. Daily enrollment and disenrollments are prorated based on the number of days in the month.

Daily changes to enrollment and capitation that are prorated on a daily basis include these types of transactions:

Add

- Newly enrolled eligibles and re-enrollments
- Newborn enrollments with enrollment begin dates retroactive to the date of birth
- Blocks of enrollment for enrollment corrections

Last Update: 6.20.2008 21

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

Disenroll

Daily disenrollments

- QUEST-Net to QUEST
- QUEST-ACE to QUEST
- QUEST to FFS
- QUEST-Net to FFS
- QUEST-ACE to FFS
- QUEST to Foster Care Out-of-State (covered by FFS)
- Island Change

Retroactive disenrollments

- Death
- Incarcerated
- Admission to State Hospital
- Out of State
- Wait List
- Transplant

Blocks of disenrollment for enrollment corrections

The transactions for these changes include the payment from and through dates and the prorated capitation amounts resulting from the enrollment actions. When a retroactive recovery is made for a person covered by the feefor-service program, the plan may file claims for reimbursement through the fee-for-service program.

See Appendix Error! Reference source not found. Error! Reference source not found. for related examples of the following scenarios:

Example: New Enrollment into QUEST

Example: Disenrollment from QUEST-Net to QUEST

Example: Time Limits on Retroactive Capitation Adjustments

Last Update: 6.20.2008 22

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

2.6.4 Monthly Payment Summary Report

MQD will place the Monthly Payment Summary Report on the Med-QUEST FTP server. The Monthly Payment Summary Report includes the capitation for the subsequent month and all adjustments to prior months that occurred since the previous monthly payment summary report was generated. The adjustments are summarized for each day and will reconcile to the amount from each daily 834. The monthly capitation for the subsequent month will reconcile to the monthly 834.

2.6.5 Payment From and Payment Through Dates

The Payment From Date and the Payment Through Date on the 820s are for adds and disenrolls only and represent the period of time being paid or recouped for the transaction.

The Payment From Date can be retroactive (newborns or PACE members, or a death). The Payment Through Date will never be greater than the end of the current processing month.

See Appendix Error! Reference source not found. Error! Reference source not found. for related examples of the following scenarios:

Example 1: Newborn Example 2: Date of Death

3 Technical Infrastructure and Procedures

3.1 Med-QUEST Data Center Communications Requirements

Health Plans and Trading Partners receive 834 and 820 Transactions from Med-QUEST by connecting to the Med-QUEST Central Site Network. They go from the Internet through a Virtual Private Network (VPN) tunnel to the Med-QUEST File Transfer Protocol (FTP) Server. In standard software-to-hardware VPN connections, VPN client software is installed and configured on each machine at the client site that requires FTP access.

Health Plans and Trading Partners can contact the Med-QUEST Systems Office at 808-692-7953 for more information on establishing connections through the Med-QUEST FTP Server.

3.2 Technical Assistance and Help

For technical assistance with the electronic data interface files (EDI), Trading partners may contact the Med-QUEST/Systems Office at 808-692-7953. All calls result in a Ticket Number Assignment for problem tracking.

3.3 File Transfer and Retention

Daily 834s remain on the FTP server for 7 calendar days before being deleted. The monthly 834 is available until the next monthly 834 is transmitted. Similarly, the 820 is available until the next 820 is transmitted. For detailed information regarding file transfer procedures, refer to section 3.4 Med-QUEST/Health Plans' File Transfers on page 25.

Last Update: 6.20.2008 24

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

3.4 Med-QUEST/Health Plans' File Transfers

3.4.1 Overview

The MQD FTP file server is the source of all file transfers between MQD, the Health Plans, and Trading Partners. Specific technical specifications and instructions have been provided directly to each health plan's technical contact. This section contains basic information regarding the MQD FTP file server.

3.4.2 Virtual Private Network (VPN)

The DHS MQD utilizes the Cisco VPN 3015 Concentrator/Client to secure the file transfers to and from the Health Plans, and Trading Partners. The VPN infrastructure consists of hardware at the MQD Kapolei site and client software allowing up to 100 simultaneous sessions. It uses a combination of unique IDs and alphanumeric passwords issued to each Health Plan, and Trading Partner to authenticate users accessing the MQD file server. As a result, the VPN creates a safe and secure connection over the Internet and allows remote access to the FTP file server with the security of an on-site user.

To obtain the client software and login information, Health Plans and Trading Partners should contact the MQD Systems Office Network Coordinator.

3.4.3 Availability

The FTP file server is available 24 hours a day, seven days a week.

3.4.4 Login

The Health Plan or Trading Partner user ID (login name) is the six-character Health Plan ID that has been assigned to each Health Plan or Trading Partner for HPMMIS. A password has been assigned to the Health Plans and Trading Partners, and verbally communicated to the designated technical contact. Additional technical specifications (IP Address, etc) have been provided directly to the Health Plan's or Trading Partner's technical contact.

Last Update: 6.20.2008

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

3.4.5 Filenames

Filenames follow a standard 8.3 format – eight alphanumeric characters for the filename itself, followed by a three character alphanumeric extension. Each Health Plan and Trading Partner has been assigned a two-character plan identifier for the purpose of naming files. The plan identifiers are:

Identifier	Health Plan
AM	Aloha Care Medical
CB	Department of Health, CAMHD
CD	Cyrca Insurance Management (Dental)
EB	Department of Health, Early Intervention Programs
HB	HMSA Behavioral Health
HM	HMSA Medical
KM	Kaiser
MD	Community Care Management Corporation (Medical
	Transaportation)
MQ	Med-QUEST Division Files (Provider Master Registry)
SM	Summerlin Medical
TP	SHOTT

3.4.5.1 File Naming Conventions

Files are sent and received by Health Plans and Trading Partners using the naming conventions listed in the table below. Filenames use the 8.3 standard; characters 1-2 identify the plans and characters 3-8 identify the date. The extensions to these files are listed in the table below.

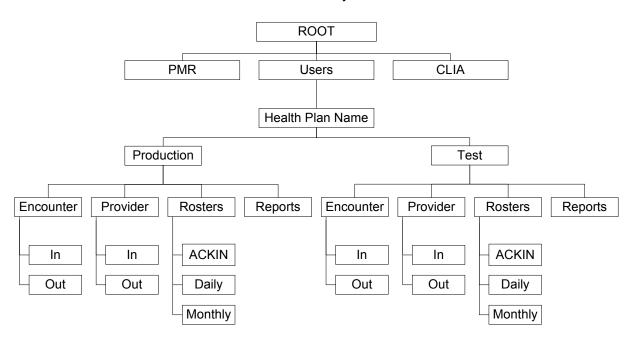

Files	Filename	Extension
Acknowledgement Files	XXYYMMDD	.997 or
		.824 or
		.TA1
Daily 834	XXYYMMDD	.DLR
Monthly 834	XXCCYYMM	.MLR
Monthly Payment Summary Report	XXCCYYMM	.CAP
Monthly 820	XXYYMMDD	.820

Last Update: 6.20.2008

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

3.4.6 Directory Structure

The directory structure for the MQD FTP file server is in the diagram below. The file layouts for encounters, providers and rosters are included in this Health Plan Manual. After the Health Plan or Trading Partner logs onto the MQD FTP file server, there are two primary folders: Production and Test. Both folders contain the same four subfolders: Encounter, Provider, Rosters and Reports.

MQD FTP Directory Structure

3.4.7 Production Folder

Day to day activities with the Health Plans and Trading Partners use the production area of the MQD FTP file server. Data files placed and retrieved from the production folders are processed by HPMMIS and should be processed by the plans to meet their contractual obligations

3.4.8 Test Folder

The test area folders are used for testing changes that the MQD or health plan may need.

Last Update: 6.20.2008

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

3.5 Problem Resolution

Eligibility is determined in HAWI and is transmitted electronically to HPMMIS. HPMMIS maintains and/or determines enrollment and generates daily and monthly 834s and client enrollment notices. HAWI generates eligibility notices. The eligibility caseworker is not involved in resolving enrollment problems.

The Enrollment Call Center answers telephone calls from clients, addresses questions on the enrollment process, explains enrollment policies and enrolls clients into medical, and if appropriate, behavioral health plans. The Member File Integrity Section (MFIS) has been established within the Med-QUEST Division to research, resolve and respond to reported problems with enrollment. Policies, procedures and performance standards have been established for these areas.

When a member contacts the Enrollment Call Center, the enrollment administrator responds with the information in HPMMIS. If the enrollment administrator determines that a problem exists in the interface between HPMMIS and HAWI, then further action is taken to correct the problem, including the potential for referral to MFIS. MFIS resolves discrepancies between eligibility and enrollment and contacts the appropriate eligibility workers to ensure the eligibility is corrected. Following the correction of the eligibility, the MFIS staff corrects the enrollment segments for these clients.

In addition to problem reports from members, plans and others, they review and resolve problem reports generated by HPMMIS. As with HAWI, the client ID is the key to the HPMMIS system. If a client is discovered to have different IDs, or is in more than one case, the health plan should report this immediately to MFIS. An individual active with more than one case will result in multiple transactions (add, change and disenrollment) because of on-going transactions from HAWI with different case ID numbers.

Last Update: 6.20.2008 28

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

4 Transaction Standards

4.1 General Information

4.1.1 HIPAA Requirements

HIPAA standards are specified in the Implementation Guide for each mandated transaction and modified by authorized Addenda. These Addenda have been adopted as final and are incorporated into Med-QUEST requirements.

An overview of requirements specific to each transaction can be found in the 834 and 820 Implementation Guides. Implementation Guides contain information related to:

- Format and content of interchanges and functional groups
- Format and content of the header, detail and trailer segments specific to the transaction
- Code sets and values authorized for use in the transaction
- Allowed exceptions to specific transaction requirements

4.1.2 Size of Transmissions/ Batches

Transmission sizes are limited based on two factors:

- Number of segments/records allowed by HIPAA standards
- Med-QUEST file transfer limitations

HIPAA standards for the maximum file size of each transaction set are specified in the appropriate Implementation Guide or its authorized Addenda. The 834 Implementation Guide recommends a limit of 10,000 INS Member Level Detail Segments in the 2000 Member Level Detail Loop. The 820 Implementation Guide has no recommended limit.

Med-QUEST has no size limitations for postings to its FTP Server.

Last Update: 6.20.2008 29

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

834 Transactions

Typically, due to constraints imposed upon the 834 Transaction by ASC X12 data structures, no more than 10,000 members can be accommodated on a single file.

The Med-QUEST translator maintains segment counts and automatically limits 834 Transactions (data between ST and SE Segments) to 10,000 INS Segments. Because members sometimes have multiple INS Segments, the 10,000 Segment cut-off is sometimes mid-member. For this reason, successive 834 Transactions (ST through SE Segments) must be processed sequentially within functional groups (GS through GE Segments).

Health plans with thousands of members can expect to sometimes receive multiple 834 Transactions within a functional group, especially for Monthly 834s.

820 Transactions

For 820 Capitation Transactions, there is no Implementation Guide limit to the number of individual members on the same transaction. The number of 2000A Organization Summary and 2000B Individual Remittance Loops on the Monthly 820 Transaction reflects the number of organization or member level capitation payments and adjustments posted for payment and in need of processing.

For large Med-QUEST health plans, Monthly 820 Transactions will sometimes have many thousands of 2000B Individual Remittance Loops. This is because of the Implementation Guide's requirement that the Total Payment Amount on the 820 Transaction match the amount of a check or electronic fund transfer.

Last Update: 6.20.2008 30

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

4.1.3 Other Standards

820 Capitation Transaction

Balancing Financial Data

There are two types of balancing procedures that both Med-QUEST and its health plans can use to ensure the accuracy of the data in the 820 Capitation Transaction. They are:

 Balancing the total amount of the payment to the capitation receiver (820 Element BPR02) to the sum of all individual and/or organization level capitation payments (Element RMR04). The BPR02 element can only occur once in the entire 820 Capitation Transaction while the member-level RMR04 can occur any number of times.

When payments or recoupments that are not specific to plan members (e.g., settlements and sanctions) are present, they appear in the 820's 2000A Organization Summary Loop. RMR04 Payment Amounts within the organization level 2000A Loop, as well as the member level Payment Amounts in the 2000B Loop, are included in the transaction level BPR02 total.

 Balancing between the total amount of the payment to the capitation receiver (element BPR02) and the amount of the monthly capitation payment to the health plan (a payment issued by the ACS Financial System) are entered manually by Med-QUEST staff.

Med-QUEST verifies 820 totals and Financial System payment amounts before it transmits 820 Transactions to health plans. The Agency anticipates that receiving health plans are also making such verifications.

Remittance Tracking

The Trace Number (element TRN02) and the Payer Identification Number (element TRN03) in the 820 Transaction's Reassociation Key (TRN) Segment should be used to reassociate the remittance advice data in the 820 Capitation Transaction with the payment sent separately by the Med-QUEST Fiscal Agent. For Med-QUEST, TRN02 is the Payment Number of the electronic transfer or check written for capitation payment by the ACS Financial System.

Last Update: 6.20.2008 31

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

Sequence of 2000B Individual Remittance Loops

On the 820 Transactions that it creates for individual member payments, Med-QUEST primarily populates the Individual rather than the Organization Summary version of the 2000 Loop (Loop 2000B rather than 2000A). Each occurrence of 2000B is equivalent to a Daily 834, Monthly 834, or Mass Adjustment Record for a health plan member. Sometimes, a member appears on more than one 2000B Loop because of multiple payments and adjustments.

The content of Daily 834, Monthly 834, or Mass Adjustment run groupings is the same as the content of the proprietary Roster Files that Med-QUEST health plans received in the pre-HIPAA environment. The major difference, aside from changes in transaction format, is that health plans now receive capitation payment data once a month rather than on a daily basis.

Last Update: 6.20.2008 32

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

4.2 Data Interchange Conventions

4.2.1 Overview of Data Interchange

When transmitting 834 and 820 Transactions to health plans, Med-QUEST follows standards developed by the Accredited Standards Committee (ASC) of the American National Standards Institute (ANSI). These standards involve Interchange (ISA/IEA) and Functional Group (GS/GE) Segments or "outer envelopes". All 834 and 820 Transactions are enclosed in transmission level ISA/IEA envelopes and, within transmissions, functional group level GS/GE envelopes. The segments and data elements used in outer envelopes are documented in Appendix B1 of Implementation Guides.

Transaction Specification tables that show how individual data elements are populated by Med-QUEST on ISA/IEA and GS/GE envelopes appear later in this section. This document assumes that security considerations involving user identifiers, passwords and encryption procedures are handled by the Med-QUEST FTP Server and not through the ISA Segment.

The ISA/IEA Interchange Envelope, unlike most ASC X12 data structures, has fixed fields of a fixed length. Blank fields cannot be left out.

Med-QUEST transmits 834 and 820 Transactions within single ISA/IEA and GS/GE envelopes. 834 Enrollment Transactions, with their limit of 10,000 members per transaction, sometimes have multiple transactions (as defined by ST and SE Segments) within the same GS/GE envelope. 820 Transactions, because they must always correspond to payments, can have any number of payment lines within a transaction and only one transaction per GS/GE envelope.

4.2.2 Outer Envelope Specifications Table

Definitions of table columns follow:

Loop ID

The Implementation Guide's identifier for a data loop within a transaction. Always "NA" in this situation because segments in outer envelopes have segments and elements but not loops.

Segment ID

The Implementation Guide's identifier for a data segment.

Element ID

The Implementation Guide's identifier for a data element within a segment.

Last Update: 6.20.2008

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

Element Name

A data element name as shown in the Implementation Guide. When the industry name differs from the Data Element Dictionary name, the more descriptive industry name is used.

Element Definition/Length

How the data element is defined in the Implementation Guide. For ISA and IEA Segments only, fields are of fixed lengths and are present whether or not they are populated. For this reason, field lengths are provided in this column after element definitions.

Valid Values

The valid values from the Implementation Guide that are used by Med-QUEST.

Definition/Format

Definitions of valid values used by Med-QUEST and additional information about Med-QUEST data element requirements.

4.3 Acknowledgment Procedures

4.3.1 Overview of Acknowledgment Processes

Although Med-QUEST does not require receivers of 834 and 820 Transactions to return electronic acknowledgements, it accepts and processes 997 Functional Acknowledgement Transactions. Receivers of 834s and 820s can return 997s as both acknowledgements of valid transactions and notifications of syntactical problems. Extensive syntactical problems are not expected because Med-QUEST applies translator edits to outgoing as well as incoming transactions and corrects any problems revealed by the translator prior to transmission. Discrepancies are possible, however, due to variations in sender and receiver edits.

Med-QUEST Interchange Flows for 834 and 820 Transactions appear later in this section. The flows are similar. Both transactions are built from HPMMIS. They are both processed by the Med-QUEST translator and posted to the Med-QUEST FTP Server to be downloaded by receiving health plans.

4.3.2 997 Functional Acknowledgement

The 997 Functional Acknowledgment Transaction is designed to check each functional group in an interchange for syntax errors and to return the results to the sending trading partner. A "functional group" consists of one or more transactions of the same kind. For example, if a health plan receives Monthly 834 Transactions with 56,000 INS Segments, six 834 Transactions will make up a functional group: five transactions with 10,000 Member Level Detail Loops each and one with the remaining 6,000.

Although each 997 Transaction can accept or reject entire functional groups, its edits can be at the transaction, segment, or data element level. It is sent within its own ISA/IEA and GS/GE envelopes and its segments and elements are of variable lengths. The 997 can be sent as an acknowledgement of receipt for a functional group of transactions or as an indication of syntax errors at the transaction, segment, or data element level.

Characteristics of the 997 Transaction include:

- One 997 Transaction corresponds to one functional group in an interchange.
- 997 Transactions are ASC Transaction Sets and are included in the interchange control structure (envelopes) for transmission.
- Many commercially available translators can automatically reconcile the 997 Transaction back to a previously transmitted functional group. This process allows the sending trading partner to identify any

Last Update: 6.20.2008 40

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

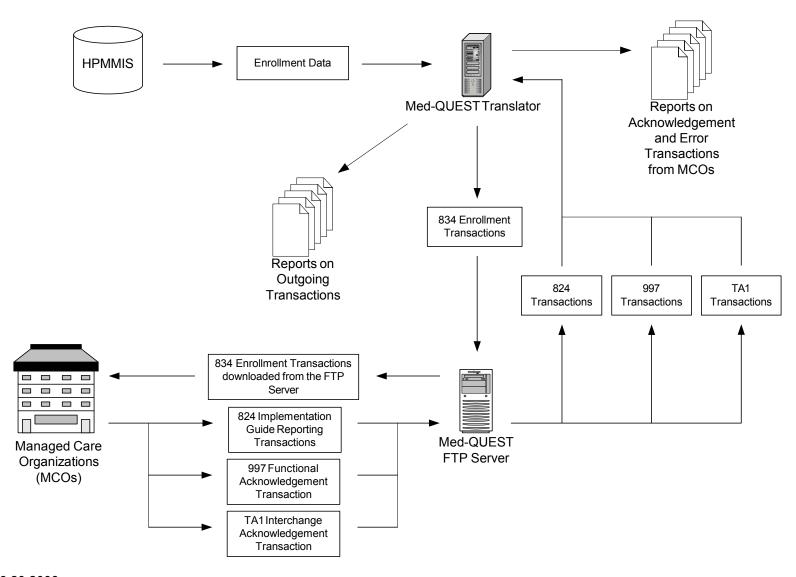

transactions that have not been acknowledged by the receiving trading partner.

• 997 Transactions should not be used to acknowledge the receipt of other 997 Transactions.

Details on the format and syntax of the 997 Transaction can be found in Appendix B of the Transaction Set's Implementation Guide.

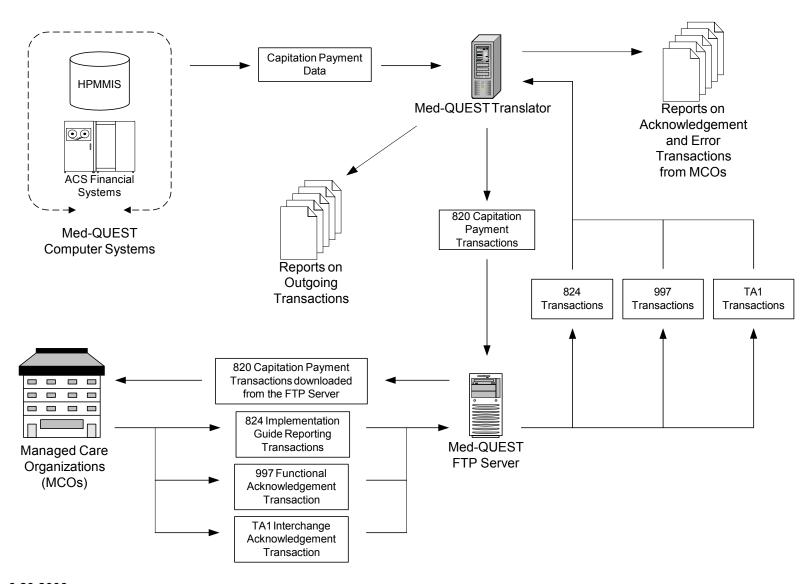

Last Update: 6.20.2008 41

Med-QUEST Interchange Flow - 820 Transaction

Last Update: 6.20.2008

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

4.4 Rejected Transmissions and Transactions

4.4.1 Overview of Rejection Process

Med-QUEST expects that its 834 and 820 transmissions will either be accepted and processed by the Health Plans, or, if there are syntactical problems, rejected without further processing. This means that a receiver that rejects any part of a transmission must reject the entire transmission. Data on rejected 834 or 820 transmissions should not be used to update Health Plans' databases.

To support use of the 997 Transaction for 834 and 820 transmissions, Med-QUEST asks the Health Plans to accept or reject the 834 and 820 Transaction at the functional group level. A functional group of one or more transactions represents the scope of the 997 Functional Acknowledgement.

Med-QUEST transmits 834 Transactions within single functional groups, even when multiple transactions (ST through SE Segments) are required. There is no limit to the number of members for whom capitation payment data can be carried on the 820 and no need to have more than one 820 Transaction within a functional group.

Last Update: 6.20.2008 44

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

5 Transaction Specifications

5.1 About Transaction Specifications

5.1.1 Purpose

The Transaction Specifications document details the code set values that Med-QUEST has established between the Health Plans and specifies the type and format of the information in data elements. In some cases these values are subsets of the data element values listed in Implementation Guides. In others, they are specific to Med-QUEST requirements.

For example, in the Subscriber Number Loop (Loop 2000, Segment REF), element REF02 is defined as an alphanumeric reference identification field that is between 1 and 30 characters long. In the 834 Enrollment Transaction Agreement, REF02 has been defined as the member's HAWI ID. The length and format of the field is based on the characteristics of the HAWI ID rather than on the variable field size defined for the 834.

5.1.2 Relationship to HIPAA Implementation Guides

Transaction agreements are intended to supplement the data in the Implementation Guides for each HIPAA Transaction with specific information pertaining to the trading partners using the transaction.

The information in the Transaction Agreements is not intended to:

- Modify the definition, data condition, or use of any data element or segment in the standard Implementation Guides.
- Add any additional data elements or segments to the defined data set.
- Utilize any code or data values that are not valid in the standard Implementation Guides.
- Change the meaning or intent of any implementation specifications in the standard Implementation Guides.

Last Update: 6.20.2008 45

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

5.2 834 Enrollment Transaction Specifications

5.2.1 Overview

The 834 Enrollment Transaction carries information on new member enrollments, enrollment terminations and changes to information on currently enrolled health plan members. The purpose of these Transaction Specifications is to identify the data elements used in the 834 Enrollment Transaction so that health plans can understand and process the data they receive from Med-QUEST.

5.2.2 Transaction Specifications Table

834 Enrollment Transaction Specifications for individual data elements are shown in the table starting on the next page. Definitions of table columns follow:

Loop ID

The Implementation Guide's identifier for a data loop within a transaction.

Segment ID

The Implementation Guide's identifier for a data segment within a loop.

Element ID

The Implementation Guide's identifier for a data element within a segment.

Element Name

A data element name as shown in the Implementation Guide. When the industry name differs from the Data Element Dictionary name, the more descriptive industry name is used.

Element Definition

How the data element is defined in the Implementation Guide.

Valid Values

Data element values listed in the Implementation Guide that are used by Med-QUEST.

Definition/Format

Definitions of valid values used by Med-QUEST and additional information about Med-QUEST data element requirements.

Last Update: 6.20.2008 46

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

834 ENR	OLLME	ENT TRAN	SACTION SPECIFI	CATIONS		
Loop ID		Element ID		Element Definition/Length	Valid Values	Definition/Format
Transact	ion Se	t Header				
NA	ST		Transaction Set Identifier Code	Code uniquely identifying a Transaction Set	834	Transaction Set Code
NA	ST	ST02	Transaction Set Control Number	The unique identification number within a transaction set		A Transaction Number assigned by Med-QUEST. It must match the number in SE02 at the end of the transaction
Transact		t Trailer				
NA	SE		Transaction Segment Count	A tally of all segments between the ST and the SE segments including the ST and SE segments		Count of all segments between the ST and SE Segments, including the ST and SE Segments
NA	SE	SE02	Transaction Set Control Number	The unique identification number within a transaction set		This number is the same number that is in data element ST02 Format is numeric from one to ten digits
Beginnin	g Set I	Header				
NA	BGN	BGN01	Transaction Set Purpose Code	This code identifies the purpose of the transaction set	00	Original Transmission Med-QUEST normally populates this element with "00". Values on resubmissions are coordinated with trading partners.
NA	BGN	BGN02	Transaction Set Identifier Code	Code uniquely identifying a Transaction Set		Med-QUEST assigns a unique Transaction Number to each 834 Transaction
NA	BGN	BGN03	Transaction Set Creation Date	Identifies the date the submitter created the transaction		CCYYMMDD format
NA	BGN	BGN04	Transaction Set Creation Time	Time file is created for transmission		Time expressed in HHMM format.
NA	BGN	BGN05	Time Zone Code	Code identifying the time zone used in specifying a time	MS	Mountain Standard Time
NA	BGN	BGN06	Transaction St Identifier Code	Code uniquely identifying a Transaction Set		BGN02 value from the original transaction when BGN01 is not "00"
N/A	BGN	BGN08	Action Code	Code indicating type of action	2 4	Change Verify BGN08 "2" transactions contain Adds, Terminations and Changes (equivalent to the Daily Roster). BGN08 "4" transactions contain snapshots of all active Health Plan members (equivalent to the Monthly Roster). Med-QUEST generates both kinds of transactions

			INS Segment - Member Level Detail																
1	2000	INS	INS01		Indicates whether the insured is the subscriber or a dependent		The Member Level Detail 2000 Loop is repeated for every health plan member. In addition, on Daily 834s, the loop occurs (with exceptions) once for each of the up to eight Med-QUEST Action Codes used on each proprietary HPMMIS update record. The major exception is for changes to a member's Name, Date of Birth and/or Gender. Any changes to these elements are instigated by a single Maintenance Reason Code per 2000 Loop. In the HIPAA-compliant system, Maintenance Reason	•	•	•	•	•	•	•	•	•	•	•	•
							Codes rather than Med-QUEST-specific Action Codes, are intended for use by transaction receivers to determine the kind of updates needed to their databases. All the same, Med-QUEST carries a proprietary HPMMIS Action in the Insured Group or Policy Number REF Segment later in Loop 2000.												
							Yes By definition, all Med-QUEST members are												
2	2000	INS	INS02	Relationship Code	Code indicating the relationship between two individuals or entities	18	subscribers rather than dependents. Self	•	•	•	•	•	•	•	•	•	•	•	•

4	2000	INS	INS04		Code identifying reason for the maintenance change		Daily 834 This critical data element is functionally equivalent to Action Code on the proprietary Daily Rosters. Refer to Appendix B.8 Maintenance Type Codes and Action Codes for information on how specific HPMMIS Daily 834 Action Codes are handled. Only a single occurrence of Maintenance Reason Code is allowed per 2000 Loop (rather than the up to eight Action Code occurrences per update record that appeared on proprietary Daily Roster Records). Because of the single occurrence limitation, each of the valid HPMMIS Action Code values for member changes (with two exceptions) generates a separate 2000 Loop and INS Segment. The two exceptions are: • The three HPMMIS Action Code values that relate to name and demographic changes ("NC", "DB" and "SX") Any or all of these Action Codes are translated and accommodated on a single 2000 Loop. For the 834 Transaction, demographic changes are defined as changes to a member's Date of Birth and/or Gender. • The HPMMIS Action Codes that have a financial impact but no impact on member data ("HK" and "SB") Daily updates with these Action Code values do not appear on the 834 but will appear on the 820 Capitation Transaction. 272	2300	HD	HD01		Code identifying a specific type of item maintenance	001 021 024 030	HIPAA compliant Maintenance Type Codes are equivalent to the following proprietary Action Type Codes from the Daily and Monthly 834s. In the 2300 Loop, the codes refer to a health plan coverage (with up to 99 past or present coverages per member). Used on Daily 834s Change – Change in an existing coverage for a health plan member Addition – Addition of a new coverage for a new or existing health plan member Termination – Ending of a coverage for an existing or terminating health plan member Used on Monthly 834s Audit/Compare - No equivalent Med-QUEST Code This loop gives health plans member enrollment information (including enrollments in other health plans) in terms of coverage and benefits. The loop is repeated for each Med-QUEST health plan, in which the member is enrolled. TPL data begins in the 2320 COB Loop within the first 2300 Loop of the first 2000 Loop sent to the receiving health plan. If there are more than five current or past TPL carriers for a member, overflow carriers appear on subsequent 2300 Loops. These subsequent TPL 2300 Loops are "continuation loops" that carry only TPL data, plus elements required by the 834 Implementation Guide or needed for loop identification. (cont.)	•		•	•	•	•	•	•	•	•	•	•

5.3 820 Capitation Transaction Specifications

5.3.1 Overview

The purpose of these Transaction Specifications is to identify the data elements used in the 820 Capitation Transaction so that health plans and other entities that receive 820 Transactions from Med-QUEST are able to understand and process transaction data. The monthly 820 Transaction does not include or accompany the actual capitation payments. It serves as a detailed capitation remittance advice that shows capitation payments and adjustments for each member, as well as payments and adjustments that are not member specific. The 820 Transaction represents the financial aspect of the proprietary Daily and Monthly Roster Files.

Affiliated Computer Services (ACS), the Med-QUEST Fiscal Agent implements Agency policy by making monthly capitation payments to health plans and other entities paid on a per member or per recipient basis. For most capitated entities, the monthly 820 reflects the data used to create 834 Enrollment Transactions, both monthly and daily. It also includes member-level adjustments that result from the mass adjustment process (i.e., adjustments that result from retroactive changes to capitation rates). There may be the possibility that entities could receive 820s without 834s. In these situations, the 820 Transactions serve as payment rosters for eligible recipients.

Last Update: 6.20.2008 77

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

5.3.2 Transaction Specifications Table

820 Capitation Transaction Specifications for individual data elements are shown in the table beginning on the next page. Definitions of table columns follow:

Loop ID

The Implementation Guide's identifier for a data loop within a transaction.

Segment ID

The Implementation Guide's identifier for a data segment within a loop.

Element ID

The Implementation Guide's identifier for a data element within a segment.

Element Name

A data element name as shown in the Implementation Guide. When the industry name differs from the Data Element Dictionary name, the more descriptive industry name is used.

Element Definition

How the data element is defined in the Implementation Guide.

Valid Values

Data element values listed in the Implementation Guide that are used by Med-QUEST.

Definition/Format

Definitions of valid values used by Med-QUEST and additional information about Med-QUEST data element requirements.

Organiza	tion S	ummary R	emittance Details			
2000A	ENT	ENT01	Assigned Number	Number assigned for differentiation within a transaction set.		Med-QUEST uses the 2000A Organization Summary Remittance Loop and the loops within it to show payment or withhold amounts that are not member specific. Settlement amounts, sanctions and partial payments are examples of how Med-QUEST can use the 2000A Loop.
						ENT01 is a unique number for each payment line within an 820 Transaction. Med-QUEST begins numeration with a "1" for the initial payment line of the 2000A Loop if a 2000A Loop is present. Sequential numeration continues through any additional 2000A lines and into 2000B lines if any are present.
2000A	ENT	ENT02	Entity Identifier Code	Code identifying an organizational entity, a physical location, property or an individual	2L	Corporation/Organization Required if the 2000A Loop is present.
2000A	ENT	ENT03	Identification Code Qualifier	Code designating the system/method of code structure used for	FI	Federal Taxpayer ID Number
				Identification Code		Required if the 2000A Loop is present.

820 CAP	ITATIO	N TRANS	ACTION SPECIFICA	ATIONS		
Loop ID		Element	Element Name	Element Definition	Valid Value	Definition/Format
2300A	RMR	RMR04	Detail Premium Payment Amount	Detailed remittance amount on the transaction		The amount of the payment (positive) or recovery (negative) On partial payment RMR Segments for which the partial payment is for detail payments that appear in other 2000A and/or 2000B Loops, RMR04 is a negative amount that represents the amount not covered by the partial payment. The ADX Segment is not needed.
						When the partial payment is for a payment amount within a particular 2000A Loop, the element is the full payment amount and a positive value in ADX01 is the difference between the full payment amount and the partial, actual payment.
						MQD sends some transactions with Voucher Numbers that contain zero amounts. Example: When MQD sends a termination that is effective on the last day of the current month, the 834 contains a Voucher Number with no recoupment. This is more of a notification.
						Similarly, when MQD sends a Rate Code Change on the last daily (effective the last day of the current month), a Voucher Number is included but has no dollar value.
Summary	/ Line	ltem			<u> </u>	
2310A	IT1	IT101	Line Item Control Number	Identifier assigned by the submitter/provider to this line item	1	The 2310A and 2315A Loops are required for "HIPAA health premium payments", according to the Implementation Guide. Med-QUEST fills HIPAA required elements in the IT1 and SLN Segments with dummy values.
Member						
2315A	SLN		Line Item Control Number	Identifier assigned by the submitter/provider to this line item		Within each payment, a sequential Line Numbers beginning with 1.
2315A	SLN		Information Only Indicator	An indicator that this segment is informational only	0	Information
2315A	SLN	SLN04	Head Count	Number of members/insured under this summary line item remittance	0	Med-QUEST fills this required element with zero.

2315A	SLN	SLN05-1	Unit for Measurement	Code specifying the units of which a value is being expressed, or manner in which a measurement has been taken	ΙΕ	Person (the unit of measurement for the SLN04 head count).
Organiza	tion S		emittance Level Ad			
2320A	ADX	ADX01		If negative, [the Adjustment Amount] reduces the provider payment; if positive, it increases the provider payment		In partial-payment-within-a-2000A-Loop situations, this is a negative amount representing the amount withheld from the health plan's payment.
2320A	ADX		Adjustment Reason Code	Code indicating reason for debit or credit memo or adjustment to invoice, debit or credit memo, or payment	H6	Partial Payment Med-QUEST makes use of the adjustment capability within the 2000A Loop to show partial payment of a Payment Amount within a particular 2000A Loop. For Med-QUEST, this is the only situation in which the ADX Segment appears on an 820 Transaction.
Individua		ttance				
2000B	ENT			Number assigned for differentiation within a transaction set		The 2300B Loop is for "detailed [i.e., member level] remittance information", including the per member payment amount for capitation pre-payments (Monthly 834s) and adjustments (Daily 834s and Mass Adjustments). ADX Segment Adjustments do not appear in the 2320B Loop within the 2000B Loop. Capitation adjustments to past health plan payments are expressed as separate 2000B Loops with their own positive or negative payment amounts. Within each 820 Transaction, ENT01 starts with 1 in the six-character Assigned Number element and increments by 1 for each member. The number in ENT01 in the 2000B Loop continues from final sanction line in the 2000A Loop if the 2000A Loop is present.
2000B	ENT	ENT02	Entity Identifier Code	Code identifying an organizational entity, a physical location, property or an individual	2J	Individual

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

Appendix A: Examples

A.1 Enrollment Corrections

Example 1: Erroneous Date of Birth

A newborn is initially enrolled on 05/09/00 based on the reported date of birth. The date of birth is subsequently verified to be 05/06/00. A block of enrollment is sent to the plan as an add transaction on a daily 834 for 05/06/00-05/08/00. The 820 will reflect capitation from 05/06/00-05/08/00.

Example 2: Erroneous Date of Death

Initially, the date of death is reported as 06/15/00. A disenrollment transaction is sent to the plan with an effective end date of 06/15/00. The date of death is subsequently corrected to 05/15/00. A block of disenrollment for 05/16/00-06/15/00 is sent to the plan as a disenroll transaction on a daily 834. The 820 will reflect a recoupment of capitation from 05/16/00-06/15/00.

Example 3: Foster Care Client Sent Out-of-State

A foster care client is enrolled with a plan and sent out-of-state midmonth on 06/17/00 and the client is placed in the fee-for-service program effective 06/17/00. A disenrollment transaction is sent to the plan effective 06/16/00 on a daily 834. The 820 will reflect a recoupment of capitation from 06/17/00-06/30/00.

Last Update: 6.20.2008 91

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

A.2 Daily Capitation Calculations

Example: New Enrollment into QUEST

The system calculates a daily capitation based on the enrollment date. As an example, if an individual is enrolled into a QUEST plan, on 03/16/00, the plan receives an add transaction on a daily 834. The enroll begin date and the payment from date will be 03/16/00. There is no enroll end date, as the client is continuously eligible. The payment through date will be 03/31/00. The system calculates the capitation payment by dividing the appropriate QUEST rate by 31 (number of days in the month of March) times 16 days of enrollment. The result of this calculation will be reflected on the next 820 transaction.

Example: Recipient Changing from QUEST-Net to QUEST

The system recoups daily capitation and pays daily capitation based on the enrollment/ disenrollment. If an individual is QUEST-Net eligible and then becomes QUEST eligible, the plan will receive a separate disenrollment transaction from QUEST-Net and another enrollment transaction into QUEST on a daily 834. As an example, the enrollment with QUEST (same plan, but different rate code) is effective 03/16/00, thus the member is disenrolled from QUEST-Net effective 03/15/00. The system calculates and recoups the daily QUEST-Net rate for 16 days (03/16/00 through 03/31/00). The system also calculates and pays the daily QUEST rate for the same time period (03/16/00 through 03/31/00) on a separate transaction.

Example: Time Limits on Retroactive Capitation Adjustments

A time limitation applies to ongoing retroactive capitation payments and recoupments. MQD limits retroactive payments and recoupments to two contract years as long as the plan still has a contract with the state. The two contract years include the current and previous contract years (usually July 1 through June 30). For example, beginning July 1, 2001, there will be no retroactive payments or recoupments prior to July 1, 2000.

The following examples illustrate this approach. Assume that each individual remains eligible so that retroactive enrollment can be processed. For deaths, the disenrollment date is equal to the date of death.

Situation	Date	Correct Enrollment/	Payment/Recoupment
	Reported	Disenrollment Date	Period Dates
Newborn	July 1, 2001	Birth date – June 30, 1999	July 1, 2000 to current month
Newborn	July 1, 2001	Birth date – June 30, 2000	July 1, 2000 to current month
Newborn	June 30, 2002	Birth date – July 1, 2001	July 1, 2001 to current month
Death	July 1, 2001	Date of death - June 30,1999	July 1, 2000 to current month
Death	July 1, 2001	Date of death - June 30, 2000	July 1, 2000 to current month
Death	June 30, 2002	Date of death - July 1, 2001	July 2, 2001 to current month

Last Update: 6.20.2008

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

A.3 Payment From and Payment Through Dates

The Payment From Date can be retroactive (in the case of a newborn or a death). The Payment Through Date can never be greater than the end of the current processing month (until the monthly roster is created for the next month).

	Example 1: Newborn born 06/15/00 on 834 dated 07/19/00 (monthly cap = \$230.00)	Example 2: Date of Death of 05/10/00 on 834 dated 07/19/00 (monthly cap = \$230.00)
Action	021 – Addition	024 – Termination
Date of Death	Blank	20000510
Enroll Begin Date	20000615	Blank
Enroll End Date	Blank (open ended)	20000510 (equal to date of death)
Capitation Amount	00035267+ [(230 * (16/30)] + 230 (capitation payment for 16 of 30 days for June + full month for July)	00061581- (\$155.81 partial recovery for May [(230/31)*21] + \$230- recovery for full month of June + \$230- recovery for full month of July)
Number of Days	047 (16 days in June + 31 days in July)	082 (21 days in May + 30 days in June + 31 days in July)
Payment From Date	20000615	20000511
Payment Through Date	20000731	20000731

^{*} Medicare codes that are used to generate the Medicare records in HPMMIS

Type of TPL Coverage Codes B.5

Code	Description
Α	Medical/Dental
В	Medical/Drugs
С	Medical/Vision
D	Medical/Dental/Drugs
E	Medical/Dental/Drugs/Vision
F	Medical/Dental/Vision
G	Medical/Drugs/Vision
М	Dental/Drugs
N	Dental/Vision
S	Drugs/Vision
1	Medical only
2	Dental only
3	Drugs only
4	Vision only
5	Hospital only
6	Behavioral Health only

Last Update: 6.20.2008 Version: 4.9

104

B.6 Health Plan IDs

Medical Plan Code	Description
ALOHAC	AlohaCare - Medical
HMSAAA	HMSA - Medical
KAISER	Kaiser - Medical
SUMMER	Summerlin - Medical

Behavioral Health Plan Code	Description
CAMHDA	CAMHD
DOHEIP	DOH Early Intervention Program
HMSABH	HMSA Behavioral Health

Island Codes B.7

Island Code	Island
01	Oahu
04	Kauai
05	Hawaii (06 will not be used)
07	Maui
08	Molokai
09	Lanai

Hawaii Prepaid Medical Management Information System Health Plan Manual - Enrollment

B.9 Maintenance Type Codes and Action Codes

Plans should use Maintenance Type Codes to process a record. Maintenance types

include:

- 021 Addition
- 001 Change
- 024 Termination
- 030 Audit/Compare

Action codes are included on the daily 834 to provide the health plans with additional transaction information.

Action Codes for Change Maintenance Type Records

Multiple maintenance codes can be sent on a change maintenance type record. Change record maintenance codes indicate which client data fields have been changed since the last daily 834 was sent to the plan.

To assist medical and behavioral health plans with the coordination of behavioral health services, changes to behavioral health enrollment are provided on the daily 834. The change (e.g., enrollment in or disenrollment from a behavioral health plan) results in a change maintenance record to the client's medical health plan. Similarly, changes to a medical health plan result in a change maintenance record to the behavioral health plan. Changes to other plan enrollments (i.e., notification to a medical plan regarding a change to a dental plan enrollment) are not sent on a daily 834. Plans can obtain this information on the monthly 834.

Action Codes for Addition and Termination Maintenance Type Records

Only one action code is sent for an Addition or Termination maintenance type record. Because there could be more than one reason for adding or deleting the enrollment, plans should use the action code for informational purposes only (i.e. to gather statistics on their enrollment). When an addition or termination record is received, the plan should update their system for all fields on the daily 834.

Addition and Termination Transactions for Inter-Island Change in Residency In addition to the Address Change transactions, HPMMIS creates termination and addition transactions when clients change their island of residence.

For Behavioral health plans, these termination and addition transactions normally occur on the last daily at the end of the month. Because behavioral health plans currently provide statewide services, these should have a zero net affect on the plan.

Medical and dental plans will receive a termination when clients change their island of residence. However, for medical plans, clients are offered the opportunity to select a new medical plan based on the plans available on their new island; therefore, medical plans may not receive an add enroll transaction for these clients.
