

You will create a HOKU profile as an
FAO if you:

- Are a Facility, Agency, Organization
- Have a Type 2 NPI
- Provide services for Med-QUEST beneficiaries

Keep in mind:

- You will need to select a provider type and specialty that correspond to the services you provide. You can find a list of provider types to choose from [here](#), or use this [graphic](#) to identify the option that best matches your work.
- If other providers will be **billing on your behalf**, you must have each provider's **Type 2 NPI** (or their **correct* Med-QUEST ID**) to add them as an Associate Billing Provider in your profile.

*NOTE – The billing providers you add as associates must have HOKU active status, and you must use the ID associated with their billing provider profile rather than any servicing provider profile they may have.
