Hawaii QUEST Integration  
Section 1115 Quarterly Report  
Submitted: September 2, 2015

Demonstration/Quarter Reporting Period:  
Demonstration Year: 21 (4/1/2015-6/30/2015)  
Calendar Year: 2/2015 (4/1/2015-6/30/2015)

Introduction

Hawaii’s QUEST Integration is a Department of Human Services (DHS), Med-QUEST Division (MQD) comprehensive section 1115 (a) demonstration that expands Medicaid coverage to children and adults originally implemented on August 1, 1994. The demonstration creates a public purchasing pool that arranges for health care through capitated-managed care plans. In 1994, the MQD converted approximately 108,000 recipients from three public funded medical assistance programs into the initial demonstration including 70,000 Aid to Families with Dependent Children (AFDC-related) individuals; 19,000 General Assistance program individuals (of which 9,900 were children whom the MQD was already receiving Federal financial participation); and 20,000 former MQD funded SCHIP program individuals.

QUEST Integration is a continuation and expansion of the state’s ongoing demonstration that is funded through Title XIX, Title XXI and the State. QUEST Integration uses capitated managed care as a delivery system unless otherwise indicated. QUEST Integration provides Medicaid State Plan benefits and additional benefits (including institutional and home and community-based long-term-services and supports) based on medical necessity and clinical criteria to beneficiaries eligible under the state plan and to the demonstration populations. During the period between approval and implementation of the QUEST Integration managed care contract the state will continue operations under its QUEST and QUEST Expanded Access (QExA) programs. The current extension period began on October 1, 2013.

The State’s goals in the demonstration are to:

- Improve the health care status of the member population;
- Minimize administrative burdens, streamline access to care for enrollees with changing health status, and improve health outcomes by integrating the demonstration’s programs and benefits;
- Align the demonstration with Affordable Care Act;
- Improve care coordination by establishing a “provider home” for members through the use of assigned primary care providers (PCP);
- Expand access to home and community based services (HCBS) and allow individuals to have a choice between institutional services and HCBS;
- Maintain a managed care delivery system that assures access to high-quality, cost-effective care that is provided, whenever possible, in the members’ community, for all covered populations;
- Establish contractual accountability among the contracted health plans and health care providers;
- Continue the predictable and slower rate of expenditure growth associated with managed care; and
- Expand and strengthen a sense of member responsibility and promote independence and choice among members that leads to more appropriate utilization of the health care system.
**Enrollment Information**

Note: Enrollment counts include both person counts (unduplicated members) and member months. Member months and unduplicated members data for April 2015 to June 2015.

**Outreach/Innovative Activities**

The DHS focused on enrolling Medicaid individuals using new Modified Adjusted Gross Income (MAGI) criteria. In addition, MQD fine-tuned its work within its eligibility system called Kauwale (community) On-Line Eligibility Assistance System (KOLEA). DHS focused applicants to apply on-
line at its mybenefits.hawaii.gov website.

At this time, DHS does not have any other outreach services for eligibility applications.

**Operational/Policy Developments/Issues**

During the third quarter of FFY15, the Med-QUEST Division (MQD) continued its monitoring of the QUEST Integration (QI) implementation that occurred in the second quarter of FFY15. QUEST Integration or QI is a melding of both the QUEST and QExA programs. QI is a patient-centered approach with provision of services based upon clinical conditions and medical necessity. QUEST Integration combines QUEST and QUEST Expanded Access (QExA) programs into one and eliminates the QUEST-ACE and QUEST-Net programs. In addition, beneficiaries remain with same health plan upon turning 65 or when changes occur in their health condition. In QUEST Integration, health plans will provide a full-range of comprehensive benefits including long-term services and supports. MQD has lowered its ratios for service coordination.

QUEST Integration has five (5) health plans: AlohaCare, Hawaii Medical Services Association (HMSA), Kaiser Permanente, ‘Ohana Health Plan, and UnitedHealthcare Community Plan. The MQD has been assuring readiness of the five (5) QI health plans since February of 2014 (see transition information later in the report).

**Expenditure Containment Initiatives**

No expenditure containment planned.

**Financial/Budget Neutrality Development/Issues**

The budget neutrality for third quarter of FFY15 will be submitted in the future.

**Member Month Reporting**

**A. For Use in Budget Neutrality Calculations**

**QUEST Integration Consumer Issues**

**HCSB Grievance**

During the third quarter of FFY15, the HCSB continued to handle incoming calls. As telephone calls come into the MQD Customer Service Branch, if related to client or provider problems with health plans (QUEST Integration or QI), transfer those telephone calls to the HCSB. The clerical staff person(s) takes the basic contact information and assigns the call to one of the social workers. MQD tracks all of the calls and their resolution through an Access database. If the clients’ call is an enrollment issue (i.e., request to change health plan), then the CSB will work with the client to resolve their issue. The CSB did not have any calls related to QI this quarter.

During the third quarter of FFY15, the HCSB staff, as well as other MQD staff, processed approximately 84 member and provider telephone calls and e-mails (see table above). The number of calls from members higher than other quarters. In previous quarters, MQD received approximately 55 to 60 calls, letters, and e-mails. The anticipated increase is due to education of members in the third quarter of FFY15 related to filing grievances and appeals (all members were sent a handout describing this benefit).
HCSB Appeals

The HCSB received four (4) member appeals in the third quarter of FFY15. DHS resolved two of the appeals with the health plans in the member’s favor prior to going to hearing. One (1) appeal was resolved in DHS’ favor. One (1) DHS is still awaiting the results. Of the four (4) appeals filed, the types of appeals were medical (1), LTSS (2), and medication (1).

Provider Interaction

The MQD and the health plans continue to have two regularly scheduled meetings with providers. One of the meetings is a monthly meeting with the Case Management Agencies. MQD focuses the meetings with these agencies around continually improving and modifying processes within the health plans related to HCBS. In addition, the MQD and health plans meet with the behavioral health provider group that serves the CCS population. This group focuses on health plan systems and addressing needs of this fragile population.

Most of the communication with providers occurs via telephone and e-mail at this time. The MQD will arrange any requested meetings with health plans and provider groups as indicated.

The MQD estimates that provider call volume has decreased due to frequent meetings with the providers throughout the program as well as the health plans addressing provider issues when the provider contacts the health plan first.

Enrollment of individuals

The DHS had an increase of enrollment of approximately 11,397 members during the third quarter of FFY15. Of this group, 194 chose their health plan when they became eligible, 3,281 changed their health plan after being auto-assigned.

In addition, DHS had 151 plan-to-plan changes during the third quarter of FFY15. A plan-to-plan change is a change in enrollment outside of the allowable choice period. Both health plans (the losing and the gaining health plan) agree to the change. Changes are effective the first day of the following month.

In addition, 16 individuals in the aged, blind, and
disabled (ABD) program changed their health plan during days 61 to 90 after a confirmation notice was issued.

Long-Term Services and Supports (LTSS)

**HCBS Waiting List**
During the third quarter of FFY15, the QI health plans did not have a wait list for HCBS.

**HCBS Expansion and Provider Capacity**
During the third quarter of FFY15, MQD monitored the number of beneficiaries receiving HCBS when long-term services and supports (LTSS) were required. The number of beneficiaries requiring long-term services and supports continues to increase. In the third quarter of FFY15, the increase is 38.6% since the start of the program receiving long-term services and supports. The number of individuals in nursing facilities increased this past quarter. HCBS usage has more than doubled since the start of the bringing the aged, blind, and disabled population into managed care (formerly QUEST Expanded Access (QExA), currently QUEST Integration). Nursing facility services have decreased by approximately 18.5% since program inception.

The number of beneficiaries receiving HCBS has increased by approximately 116% since program inception. At the start of the program, beneficiaries receiving HCBS was 42.6% of all beneficiaries receiving long-term care services. This number has increased to 66% (66.3%) since the start of the program.

**Behavioral Health Programs Administered by the DOH and DHS**

Individuals in Community Care Services (CCS) have a Serious Mental Illness (SMI) diagnosis with functional impairment. The Medicaid beneficiaries who continue to receive services from AMHD are legally encumbered. These individuals are under court order to be cared for by AMHD.

The Child and Adolescent Mental Health Division (CAMHD) under the DOH provides behavioral health services to children from ages three (3) through twenty (20). CAMHD is providing services to approximately 1,200 children during the third quarter to FFY15.

**QUEST Integration transition**

Demonstration Approval Period October 1, 2013 – December 31, 2018
The MQD moved all of its QUEST and QExA population into the QUEST Integration (QI) program on January 1, 2015. The transition was seamless with all five health plans being ready to accept their new members. All five health plans received transition of care files in November and December 2014 that allowed them to maintain services through March 31, 2015 (or until a new health and functional assessment (HFA) was conducted). In addition, several health plans maintained services to June 30, 2015 while they completed their HFAs.

The MQD continued to conduct three additional oversight processes. Information about these programs is included below.

1. **Ride along program**
   MQD nurses and social workers went on home visits with service coordinators to observe their conducting assessments and developing service plans. These ride alongs identified areas for improvement to include pre-filling assessments prior to the visit, talking with members to obtain information instead of reading the questions from the assessment tool, and listening to needs of the member more than paying attention to questions on the assessment tool. MQD shared these observations with health plan leadership in April 2015.

2. **Customer Service Call Listen-In program**
   MQD staff listened to live health plan QUEST Integration customer service calls to ensure that customer service representatives were meeting MQD contract requirements. Initially, all five health plans had room for improvement. After providing health plans with a summary of the listen-in program, all five health plans are performing at 100%. MQD continues to listen to calls to support our beneficiaries.

3. **Review of all reductions of home and community based services**
   Health plans submitted all reductions of HCBS services to MQD for review weekly. MQD did not see any indication of health plans reducing HCBS incorrectly.

**Quality Assurance/Monitoring Activity**

**MQD Quality Strategy**

Our goal continues to ensure that our clients receive high quality care by providing effective oversight of health plans and contracts to ensure accountable and transparent outcomes. We have adopted the Institute of Medicine’s framework of quality, ensuring care that is safe, effective, efficient, customer-centered, timely, and equitable. MQD identified an initial set of ambulatory care measures based on this framework. MQD reviews and updates HEDIS measures annually that the health plans report to us.

MQD continues to update its quality oversight of home and community based services, which will affect mostly our QI health plans, the DDID program, and the Going Home Plus program. MQD uses quality grid based upon the HCSB Quality Framework for monitoring the DDID program. The quality grid includes measures that span the six assurances and sub-assurances of level of care, service plans, qualified providers, health and welfare, financial accountability, and administrative authority. We have also been working on behavioral health monitoring and quality improvement.

Our quality approach aspires to 1) have collaborative partnerships among the MQD, health plans, and state departments; 2) advance the patient-centered medical home; 3) increase transparency- including making information (such as quality measures) readily available to the public; 4) being data driven; and 5) use quality-based purchasing- including exploring a framework and process for financial and non-financial incentives.
MQD updated its quality strategy and submitted a draft version to CMS on December 18, 2014. MQD is waiting feedback from CMS prior to implementing. The revised quality strategy is consistent with the previously approved 2010 version.

Quality Activities during the quarter

The following is a description of the EQRO activities completed for this quarter. The EQRO performs oversight of health plans for the QI and Community Care Services (CCS) programs:

The following is a description of the External Quality Review Organization (EQRO) activities completed for this quarter. The EQRO performs oversight of health plans for the QI and Community Care Services (CCS) programs. The Health Services Advisory Group (HSAG) did the following:

1. Validation of Performance Improvement Projects (PIPS) –
   - Presented Module 3: Intervention Determination specific training (Process Mapping, Failure Modes and Effects Analysis, Failure Mode Ranking and Change Concepts) to the MQD and health plans at the end of May.
   - Module 3 submissions were due at the start of July.
   - Reviewed resubmissions of Modules 1 and 2 and provided feedback and technical assistance to the health plans.
   - All health plans passed Modules 1 and 2.

2. Healthcare Effectiveness Data and Information Set (HEDIS) –
   - Worked with health plans to complete follow-up items requested in the Information Systems (IS) Tracking Grids.
   - All medical record review activities completed and medical record review validation (MRRV) results provided to the health plans.
   - All follow-up items resolved and health plans submitted final rates with Managed Care Organization (MCO) lock applied to Interactive Data Submission System (IDSS) submissions by 6/8/15.
   - Health plans submitted signed HEDIS Roadmap Attestation upon approval from the lead auditor and prior to completion of final rate review.
   - Final rate review completed by 6/15/15 (auditor lock applied to IDSS submissions; health plans marked final, completing the IDSS submission process).
   - HSAG developed a macro that will lock the entire workbook so that no revisions can be made, alleviating the MQD’s concerns regarding changes. The MQD approved this method.

3. Compliance Monitoring –
   - On 5/6/15, provided one of the health plans and the MQD with the final 2015 compliance review report and a template for this health plan to complete its corrective action plan (CAP). The CAP was due on or before 6/8/15.
   - Received and coordinated with the MQD on the evaluation of sufficiency of the health plan’s CAP from its 2015 compliance review. Following revision and resubmission of the CAP, the health plan received approval of the CAP on 6/15/15.
   - On 6/30/15, the health plan uploaded its 2015 CAP implementation documentation for review.
   - Corresponded with the MQD regarding status of CAP actions and approvals of CAP documents for some of the other health plans.
- Updated the health plans’ 2014 compliance review CAP reports, received approval from the MQD, and sent the request for CAP status updates from each of the plans on 5/29/15. CAP status reports were due from the plans on or before 6/30/15.
- Received 2014 CAP status updates from the other health plans as requested.
- Assisted the MQD with review of documents and feedback to the plans on remaining findings from the 2014 compliance reviews. These documents centered on the plans’ credentialing and contracting processes and capture/reporting of provider disclosure information (42 CFR 455).

   - Submitted weekly disposition reports to the MQD in April 2015.
   - Mailed third postcard reminders to non-respondents and refreshed phone number files prior to Computer Assisted Telephone Interviewing (CATI) using Telematch in April.
   - Performed CATI monitoring of survey vendor on 4/20/15.
   - Extended the timeline for the survey fielding to 5/6/15 in order to allow for additional time to perform telephone follow-up of non-respondents. (This extension did not impact the timeline for submission of deliverables to the MQD.)
   - Completed CATI for non-respondents and notified the MQD survey field closed on 5/6/15.
   - Received data files from subcontractor on 5/18/15.
   - Began reconciliation of raw survey data.
   - Completed submission of Medicaid survey data to National Committee for Quality Assurance (NCQA) for all health plans at end of May.
   - Submitted final, reconciled disposition report to the MQD and notified the MQD that submission of the health plans’ CAHPS data to NCQA was completed on 6/1/15.
   - MQD completed National CAHPS Benchmarking Database (NCBD) account reactivation process and provided HSAG with vendor account access by 6/5/15.
   - Notified the MQD on 6/15/15 that submission of data to NCBD for the health plans and CHIP was completed.
   - Began survey data analysis for production of Star Reports and preparation of member-level raw survey data files for submission to the MQD.

5. Provider Survey –
   - Participated in call with the MQD on 4/2/15, to discuss possible solutions for provider email addresses not being available on sample frame file.
   - Received the MQD’s final approval of the reformatted survey instrument and received the MQD’s final approval of the revised cover letters in the beginning of April.
   - Submitted the revised provider notification document and revised project timeline to the MQD for review on 4/6/15. Revised project timeline approved by MQD on 4/8/15.
   - Received the health plans’ sample frame file crosswalks of provider IDs and available email addresses from the MQD on 4/17/15.
   - Completed review of the sample frame file crosswalks (with provider email addresses), provided by the health plans, on 4/21/15.
   - Sent provider survey sample frames to subcontractor on 4/24/15.
   - Selected survey samples in the beginning of May.
   - Mailed first provider surveys and cover letters to all sampled providers and launched website for providers to complete the survey via Internet on 5/18/15.
   - Sent first electronic reminders via email notification to non-respondents with available email addresses on 6/3/15.

- In May began preparing templates for each health plan’s reporting of initiatives taken to address recommendations made in last year’s technical report.
- Then, prepared documentation of 2014 EQRO recommendations and provided them to the MQD for review and approval prior to requesting updates from the plans.
- Received the MQD’s approval and sent the requests for documentation of improvement activities to the plans on 6/30/15.
- Documentation was due back to HSAG on 8/14/15 for inclusion in the 2015 annual technical report.

**QUEST Integration Dashboard**
The MQD receives dashboard on QUEST Integration program monthly (see Attachment A for months April, May, and June 2015). These reports allow MQD to track provider network, claims processing, processing of prior authorization, and call center statistics at a glance.

**Demonstration Evaluation**
MQD submitted its QUEST Integration Draft Evaluation Design to CMS on December 18, 2014.
