Many health plans report utilization or frequency of services on a Per 1000 members basis. This allows for a consistent statistical comparison across health plans and time periods. It is the use or occurrence (of a service, procedure, or benefit) for every 1,000 members on an annualized basis. This enables health plans of different sizes to be compared and to compare different time periods (by annualizing). An example would be "80 hospital admissions per thousand members." This means that for every 1,000 members 80 are admitted to a hospital every year, so a health plan with 100,000 members would have 8,000 admissions in one year.
