Behavioral Health	★★★	★★★

Star Rating ^{3,4}	
★★★★★	Best
★★★★	Very Good
★★★	Good
★★	Fair
★	Poor

Note: Patient Satisfaction and Quality Measures are explained in detail in the Appendix.

¹ Patient Satisfaction measures are collected from surveys to get consumer and patient thoughts on health care. These surveys cover important topics, such as doctors’ communication skills and how easy it is to obtain care.

² Many health plans use Quality Measures to measure performance on important areas of care.

³ The best star rating is at or above 90% of all Medicaid health plans’ scores. A very good star rating is at or between 75% and 89% of all Medicaid health plans’ scores. A good star rating is at or between 50% and 74% of all Medicaid health plans’ scores. A fair star rating is at or between 25% and 49% of all Medicaid health plans’ scores. A poor star rating is below 25% of all Medicaid health plans’ scores.

⁴ The health plan populations may have different traits, such as gender, race, and income, and got care in a different way that can affect measure results.

Appendix

QExA Medicaid Managed Care Plans Quality Measure Rates in 2012

Measure Name	'Ohana Health Plan	United Healthcare Community Plan
Use of Correct Medications for People with Asthma	74.7%	73.7%

♦ <i>Continued Medication Treatment for 84 days</i>	52.1%	49.0%
♦ <i>Continued Medication Treatment for 180 days</i>	33.3%	39.2%

⁵ The score for this measure is reversed since lower rates mean better performance.

Appendix

Patient Satisfaction and Quality Measures

Patient Satisfaction⁶

Health Plan Satisfaction: Members think their health plan is doing a good job and they are happy with their care.

Doctors' Communication and Service: Members think all of their doctors do a good job of explaining things to them, and that they spend enough time with them. Also, members think their personal doctor and specialist are doing a good job taking care of them.

Getting Care: Members think they get the care they need for themselves, and that they get the care they need quickly.

Coordination of Care: Members think their doctor is staying up to date on the care they got from another doctor.

Quality Measures⁷

Asthma/COPD Care: Members get the correct medicines to treat asthma and COPD.

Diabetes Care: Members get the tests they need to prevent problems with diabetes.

Heart Conditions Care: Members get the tests they need to prevent heart problems and show good control of cholesterol and blood pressure.

Cancer Screening: Members get the tests they need to prevent breast, cervical, and colorectal cancer.

Emergency Room Use: Measures the number of visits members made to the emergency department. In this case, more stars mean fewer visits.

Behavioral Health Care: Members get follow-up care after they were in the hospital for a mental illness. Also, members took medicine to treat depression.

⁶ Patient Satisfaction Measures were obtained from a trusted source, Consumer Assessment of Healthcare Providers and Systems (CAHPS®) surveys. CAHPS® is a registered trademark of the Agency for Healthcare Research and Quality (AHRQ).

⁷ Quality Measures were obtained from a trusted source, Healthcare Effectiveness Data and Information Set (HEDIS®). HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).
