Star Rating	
★★★★★	Best
★★★★	Very Good
★★★	Good
★★	Fair
★	Poor

Note: Patient Satisfaction and Quality Measures are explained in detail in the Appendix.

¹ Patient Satisfaction measures are collected from surveys to get consumer and patient thoughts on health care. These surveys cover important topics, such as doctors' communication skills and how easy it is to obtain care.

² For adult measures, the best star rating is at or above 90% of all Medicaid health plans' scores. A very good star rating is between 75% and 89% of all Medicaid health plans' scores. A good star rating is between 50% and 74% of all Medicaid health plans' scores. A fair star rating is between 25% and 49% of all Medicaid health plans' score. A poor star rating is below 25% of all Medicaid health plans' scores. For child measures, the best star rating is at or above 80% of all Medicaid health plans' scores. A very good star rating is between 60% and 79% of all Medicaid health plans' scores. A good star rating is between 40% and 59% of all Medicaid health plans' scores. A fair star rating is between 20% and 39% of all Medicaid health plans' score. A poor star rating is below 20% of all Medicaid health plans' scores.

³ Many health plans use Quality Measures to measure performance on important areas of care.

⁴ The best star rating is at or above 90% of all Medicaid health plans' scores. A very good star rating is between 75% and 89% of all Medicaid health plans' scores. A good star rating is between 50% and 74% of all Medicaid health plans' scores. A fair star rating is between 25% and 49% of all Medicaid health plans' score. A poor star rating is below the 25% of all Medicaid health plans' scores. For reverse scoring, the best star rating is below the 10% of all Medicaid health plans' scores. A very good star rating is between 10% and 24% of all Medicaid health plans' scores. A good star rating is between 25% and 49% of all Medicaid health plans' scores. A fair star rating is between 50% and 74% of all Medicaid health plans' scores. A poor star rating is at or above the 75% of all Medicaid health plans' scores.

⁵ The score for this measure is reversed since lower rates mean better performance.

Appendix

QUEST Medicaid Managed Care Plans Quality Measure Rates

Measure Name	AlohaCare Rate	HMSA Rate	Kaiser Rate
Use of Correct Medications for People with Asthma	82.8%	89.2%	94.4%
Diabetes Care			
Eye Exam	45.7%	46.2%	72.8%

Cervical Cancer Testing	54.9%	67.3%	80.3%
Chlamydia Testing in Women	52.5%	50.9%	75.3%
Emergency Visits ⁷	45.4	38.4	26.7

Patient Satisfaction^{8,9}

Health Plan Satisfaction: Members think their health plan and their children's health plan are doing a good job and they are happy with their care.

Doctors' Communication and Service: Members think all of their doctors do a good job of explaining things to them and their children, and that they spend enough time with them and their children. Also, members think their personal doctor and specialist are doing a good job taking care of them and their children.

Getting Care: Members think they get the care they need for themselves and their children, and that they get the care they need quickly.

Quality Measures^{8,9}

Asthma Care: Members get the correct medicines to treat asthma.

Diabetes Care: Members get the tests they need to prevent problems with diabetes.

Heart Conditions Care: Members get the tests they need to prevent heart problems and show good control of cholesterol and blood pressure.

Vaccinations for Children: Children get the vaccines they need to keep them healthy.

Women's Preventive Health: Women get the tests they need to prevent breast cancer, cervical cancer, and to treat infections that can cause problems.

Emergency Room Use: Measures the number of visits members made to the emergency department. In this case, more stars mean fewer visits.

⁶ Not Applicable (NA) means the plan was not able to provide enough data for this measure.

⁷ This rate is the number of visits per 1,000 member months.

⁸ Patient Satisfaction and Quality Measures were obtained from trusted sources, Consumer Assessment of Healthcare Providers and Systems (CAHPS®) surveys and Healthcare Effectiveness Data and Information Set (HEDIS®), respectively. CAHPS® is a registered trademark of the Agency for Healthcare Research and Quality (AHRQ). HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

⁹ The health plan populations may have different traits, such as sex, race, and income, and got care in a different way that can affect measure results.
