### INFORMATION ABOUT HAWAII'S MEDICAID EARLY AND PERIODIC SCREENING, DIAGNOSIS AND TREATMENT (EPSDT) PROGRAM

## I. **PROGRAM OVERVIEW**

The Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Program is a federally mandated program under Title XIX of the Social Security Act that provides preventive and comprehensive health services for Medicaid-eligible individuals under age 21. The combination of each element of the program's name makes the program unique:

Early:	A Child's health is assessed as early as possible in the child's life in order to prevent or find potential diseases and disabilities in their early stages, when they are most effectively treated.
Periodic:	Assessing a child's health at regularly scheduled intervals to assure that a condition, illness or injury is not incipient or present.
Screening:	A comprehensive child health assessment to determine if a child has a condition, illness or injury that should be referred for more definitive evaluation and/or treatment.
Diagnosis:	The definitive evaluation by appropriate medical practitioners to determine the nature, extent or cause of a condition, illness or injury.
Treatment:	The medical and remedial services permitted under Medicaid and determined medically necessary to correct or ameliorate problems identified during screening or diagnostic procedures.

The scope of required services for the EPSDT Program is broader than for the Medicaid Program in general. Federal requirements imposed by the EPSDT statutory provisions of the Omnibus Budget Reconciliation Act of 1989 (OBRA '89) mandate that the State covers all Title XIX services included in Section 1905(a) of the Act if needed to correct or ameliorate defects and physical and mental illness and conditions discovered as a result of EPSDT screening services.

### II. PURPOSE OF EPSDT

The purpose of the EPSDT Program is to provide Medicaid-eligible infants, children and youth with quality comprehensive health care through primary prevention, early diagnosis and medically necessary treatment of conditions.

### III. PERIODICITY SCHEDULE

Health Screening Assessments:
